SERVICE BULLETIN NO. 42

NOTICE OF OBSOLESCENCE

1000 HUB

The purpose of this bulletin is to advise that our 1000 Hub has become obsolete and is no longer available.

If Service or Production requirements develop for the 1000 Hub, we suggest the use of our 1020 Hub.

Because of a difference in drum pilots, (1000 Hub has 9.44 drum pilot/1020 Hub has 8.53 drum pilot), when our 1020 Hub is used as a service replacement the entire assembly must be replaced.

Should you have any questions regarding the above please contact our Engineering or Sales Department.
