LiuGong

TOUGH WORLD. TOUGH EQUIPMENT.

A POWERFUL HERITAGE

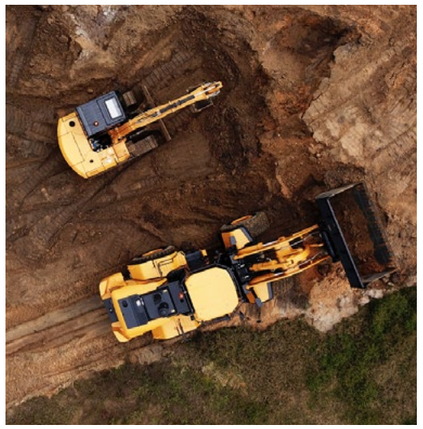

For over 65 years, LiuGong has built a reputation for designing and building a tough range of machines that help customers do more and earn more.

Today, the range includes more than 30 different product lines covering all major construction application. Tough and nimble, intelligent and adaptable, the worldclass design always has, and always will, put customers in control.

Customer insight has inspired engineering and manufacturing to deliver machines which are tougher and more reliable, easier to control, and are at the forefront of intelligent technology.

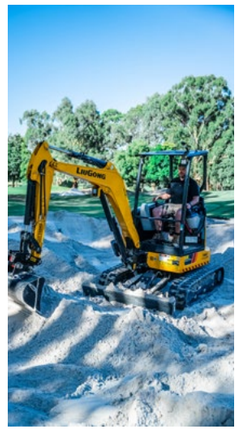

PRODUCT LINE

- Wheel Loaders
- Excavators
- Motor Graders
- Rollers
- Skid Steers

A POWERFUL PARTNER

LiuGong Australia delivers high customer satisfaction with our uncomplicated machinery and fast, reliable service.

As one of the world's leading heavy equipment suppliers, LiuGong are backed by an extensive experienced and support network, with reliable machines and attachments to get the toughest jobs done right.

Perfect for Australia's tough conditions, and with world-class partners like ZF and Cummins, LiuGong equipment reduces costs, increases productivity and maximises profits.

AFTER-MARKET FOCUS

Customer Orientated:
- iLink
- Low maintenance
- Extended Warranty

Ever-evolving training:
- Dealer development
- Local R&D
- Online resources

Local parts support:
- Fast-moving parts located where they're needed
- AU depots of parts holdings

Trusted service centres:
- Strategically located dealers to ensure service is available when needed

1958
1958: LiuGong was founded.

1968
1966: Manufactured China's first wheel loader.

1992
1993: Listed on the Shenzhen Stock Exchange

1999
1995: Started first international joint venture, joining with ZF to produce transmission cases

2000: The start of rapid product line expansion, ensuring a full lineup of machines by 2011

2004: Began developing global markets, entered Australia with McIntosh Distributon

2012
2015: New Global research & development centre opened in Liuzhou.

2019: Launched the world's first 5G-based intelligent remote control wheel loader and large battery electric vehicles (BEVs)

LEADING IN BATTERY ELECTRIC VEHICLE TECHNOLOGY

A WORLD LEADING BEV RANGE

With 25,000+ electric machines operating worldwide, 60+ million cumulative operating hours, and 2,000+ machines exceeding 10,000 hours on their original battery pack, LiuGong's electric range is among the most proven in the industry.

It's electric technology is built to perform, day after day, in demanding environments.

GUARANTEED RELIABILITY

5 YEAR 10,000 HOURS WARRANTY

This guarantee underlines the confidence we have in our electric machines, born out of real-life controller experience in tough, commercial job sites.

LiuGong

REDUCE YOUR COST OF OWNERSHIP WITH BEV

up to
70% reduction
in operating costs over 5 years

up to
50% reduction
in maintenance costs over 5 years

IN THE FIELD

Increased operator comfort with substantial noise & heat reductions

Improved operational performance from machinery cycle times, 1-hour fast charging is available for continuous operations **Charging times are based on batteries being fully depleted at shift change, which is typically not the case.*

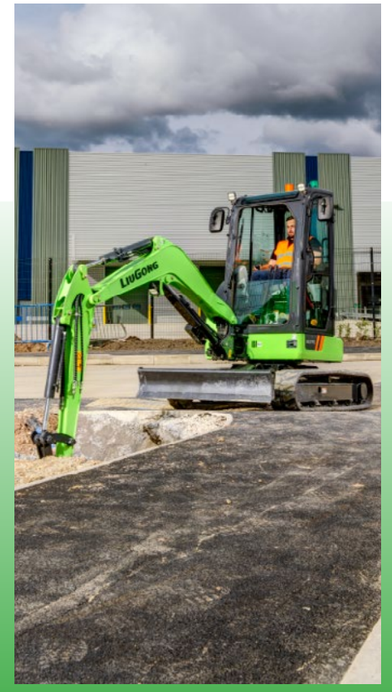

Environmental benefits with reduced CO^2 emissions

Increased up-time with less frequent servicing intervals required

Intelligent real-time telemetry allows for remote support and reduced down-times

CHANGE FOR BETTER RETURN ON INVESTMENT

DIESEL VS ELECTRIC?

This is the big question. In a straight cost-per-ton comparison, changing to electric makes sense on the job site and on the balance sheet.

30-40% of diesel use is idle time; Battery electric equipment stops energy draw 30 seconds after inactivity, reducing excess usage.

ENERGY EFFICIENT INTELLIGENT COOLING
