“What does it mean to upgrade someone’s everyday?”

Have you ever noticed how much time you spend in the bathroom? After all, it’s much more than just a place to brush our teeth, groom ourselves and take a shower. In fact, almost all of our days start and end right there. For many people, it’s even a cozy retreat to unwind, recharge, and be alone. Above all it’s an intimate space.

That’s why we at Duravit see the bathroom as the centerpiece of our homes. And it’s our ambition to make people’s everyday lives better – by offering them outstanding bathroom design. And so, we constantly ask ourselves: how can we make the bathroom an even more beautiful and smarter place?

I believe that the correct answer to this question is the careful interplay of design, excellence, responsibility, and wellbeing. We must deliver on this brand promise with all of our creations – in order to ensure that our customers always get the best experience.

With our bathroom solutions, we’re set to make your everyday life better – what more beautiful purpose could there be?”

Stephan Patrick Tahy
CEO

Life is an adventure. Ours started in 1817.

Your bathroom should be a place of rest, comfort and relaxation. Our Duravit bathroom ceramics are designed by renowned designers and manufactured by experts. They have been providing customers with the best quality, sophisticated functionality and attractive aesthetics for more than 200 years. We have made it our mission to upgrade your everyday to a new level of comfort.

Whether it’s new construction, a renovation or setting targeted accents: With our high-quality bathroom furniture and our durable bathroom ceramics, you can create a stylish and relaxing atmosphere in no time at all by taking advantage of the interplay between shower, bathtub, faucets and accessories.

“For me it was always important to work with crafts and materials. We are human beings and I think for us it’s very important to use our senses. It was really important for me to create something we can experience.”

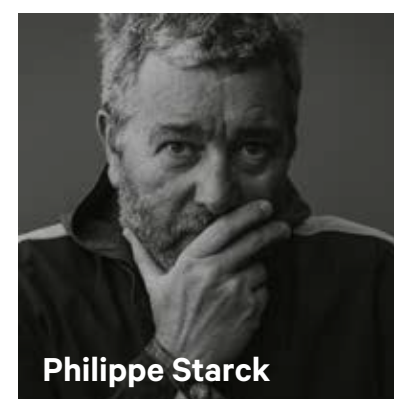

Sebastian Herkner
Zencha Range Designer

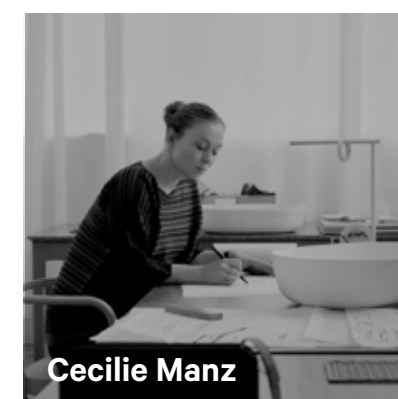

The Visionary Designers of Duravit

Duravit champions a precisely formulated, recognisable and sustainable design idiom which is applied uniformly in all the market regions in which the company operates. At the root of this idiom is the palpable embodiment of the design in elementary, archetypal forms. The design idiom is of such importance to Duravit that it is fundamental to the essence of the company’s brand, along with the highest standards of product quality and comfort-enhancing technology.

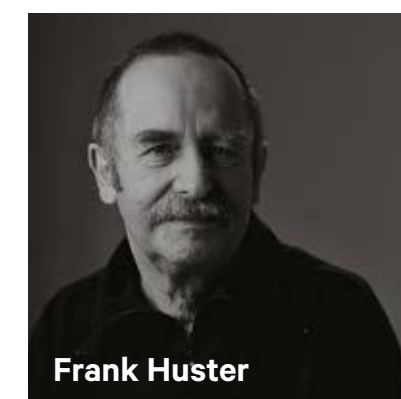

The unique network of 17 internationally successful designers, architects and their teams continues to develop the Duravit design concept. To date, their collaboration has given rise to 83 product lines and bathroom ranges which have won Duravit well over 160 design prizes and awards.

We are taking a quantum leap towards a sustainable future

When we talk about sustainability, we must talk about longevity. After all, we want to enable people to make the most of their bathrooms for generations. Therefore, high quality materials and timeless design in the bathroom are musts for us at Duravit. As a complete bathroom solutions provider, there is one natural material beyond all others at the heart of our product selection, one of the most durable and resistant ceramic.

Duravit is proud to announce that we are the first in the world to introduce a climate-neutral ceramic production facility which is being built at the Matane site in the Canadian province of Québec.

Ceramic sanitary ware products such as WCs and washbasins will be manufactured here in the future exclusively using renewable energies. For the firing process, Duravit will use the world's first electric roller kiln powered by electricity from hydropower. The use of this innovative technology will save around 11,000 tons of CO2 per year compared to a conventional ceramic factory.

Duravit thus becomes a pioneer in the industry.

OUR GOAL IS SET:
BECOME CLIMATE-NEUTRAL
BY 2045

SensoWash®

Naturally clean and fresh. Nothing is as thorough, as hygienic, as natural and as refreshing as cleansing with water. This is why the shower-toilet – a toilet-bidet combination – is becoming increasingly popular. Considerably softer and gentler than toilet paper, water also provides freshness. The shower-toilet leaves users feeling clean and refreshed. Duravit's latest contribution to the topic is SensoWash®: an innovative range of high-quality shower-toilets that meets every requirement for the contemporary bathroom – hygienic cleanliness, high operating comfort and sustainable design.

Seat heating and energy saving mode:

The ergonomic, heated toilet seat feels pleasant and its temperature can be individually controlled. In energy saving mode the seat heating is only activated at individually specified times and days and turned off afterwards. This means it can be switched off during the night, for example.

Warm air dryer: The use of the various shower functions is followed by a gentle flow of warm, drying air. The temperature of the warm air dryer can be adjusted using the app. With this function, too, it is possible to save personal preferences and to retrieve them.

Odour extraction: The convenient odour extraction function can be activated via the remote control or app.

Night light: illuminated inner bowl. When it's dark, a night light function provides orientation and safety, without interrupting the body's repose.

Lid opening/closing: The lid can be configured to open and close as the user walks away. Flat, elegant and pleasant to hold, the SensoWash® i Plus remote control fuses tactile, functional comfort with unmatched design. More compact and focused in its functional scope, but similarly convenient is the SenoWash® i lite remote control. Both versions can also be individually configured and controlled using the SensoWash® app.

Duravit Rimless® features impressive performance, efficiency and hygiene. The open design of the toilet rim enables a new type of flushing action: resulting in a dynamic and powerful flow of water that rinses the entire inner surface of the bowl. This ensures perfect and hygienic flushing results.

HygieneGlaze 2.0 The durable glaze baked into the ceramic is not only especially effective, but also acts very quickly. After just six hours, 90% of bacteria are killed and after 24 hours 99.999 % have been eliminated, an unprecedented level. Not available in combination with WonderGliss.

SENSOWASH® STARCK F - FEATURES AND BENEFITS

	Rearwash		Bacterial-growth-inhibiting glaze		Descaling function
	Ladywash		Water temperature		Warm air dryer
	Automatic lid opening/closing/		SensoWash® App		Night light function
	Electromotive actuated seat/lid		Water spray intensity		Seat heating
	Duravit Rimless®		Remote control		User profiles
	Comfortwash		Spray wand position		Odour extraction

SENSOWASH® i PLUS - FEATURES AND BENEFITS

	Rearwash		Water temperature		Warm air dryer
	Ladywash		SensoWash® app		Night light function
	Automatic lid opening/closing/		Integrated flushing system		Seat heating
	Soft Closure		Water spray intensity		User profiles
	Duravit Rimless®		Remote control		Odour extraction
	Comfortwash		Spray wand position		
	Bacterial-growth-inhibiting glaze		Descaling function
