### Performance Disclosure

Past performance is no guarantee of future results, which may differ substantially. All calculations of returns and asset growth represent performance after consideration of model fees for StratFI, underlying investments, and associated trading costs. Strategy risk, investment return, principal value, and yield will fluctuate over time.

Total return for the strategy is based on composite performance from the month of inception and assumes reinvestment of dividends and capital gains. Net composite performance results were created by StratFI in conjunction with Longs Peak Advisory, using time-weighted rates of return. Performance results do not reflect any taxes that a shareholder may pay on fund distributions and realized capital gains. The U.S. Dollar is the currency used to express performance.

StratFI claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

### Asset Allocation and Holdings Disclosure

Strategy mix, individual holdings, and asset allocation may change over time based on manager discretion.

The Morningstar Equity Style Box is a nine-square grid -- with market capitalization characteristics in three size categories: "small" (bottom row), "mid" (middle), and "large" (top). The three style categories are "value" (left column), "growth" (right), and "blend" (middle). The darkened square details how the holding is classified by Morningstar.

### Benchmark Disclosure

The Morningstar Target Allocation Index family consists of indexes that offer a diversified mix of stocks and bonds created for local investors to benchmark their allocation funds. Morningstar's Category classification system defines the level of equity and bond exposure for each index. It is not possible to invest directly into this index.
