

STRESS BUSTER

Allowed Input
Cert. No. 19013

Approved to use in
Organic Agricultural System

Make plants stronger against heat / drought / frost / saline conditions

Defends your yield during the hardest conditions while promoting growth during normal conditions. It's the high quality active ingredients that make this product work so well.

Packaging Sizes: 20L, 1000L

Stress Buster contains

Seawin's Polysaccharides

- Help to fight frost by reducing freezing point: able to penetrate through cell walls and get absorbed easily to increase the amount of total soluble sugars which reduces freezing points
- Help to fight drought & salt stress by increasing the osmotic pressure and preventing water loss

Polyglutamic Acid

- Protects from frost by forming a layer of physical protection at the root and the leaf surface
- Protects from frost by enhancing the bio-membrane system's stability
- Protects from drought & heat stress: Strong water holding capacity, holds more water in soil, also the thin layer formed on the leaves reduces transpiration
- Growth promoting properties: Can be broken down into short chain amino acids overtime and becomes available nutrient for plants' uptake

Natural Osmolytes from Seaweed extract

Protect against salt, heat & drought stress: Betaine, mannitol and other osmolytes naturally occurring in seaweed, can regulate osmotic pressure and increase plants' resistance against the harsh conditions

Active ingredients

Organic Matter.....	10%
Seaweed Polysaccharide.....	3%
Polyglutamic Acid (γ-PGA).....	1%

Physical Characteristics

Brown liquid, pH 4-6,
specific gravity 1.080

Ground Application

Foliar: 165ml per 100L of water
Or 1-2L/Ha, minimum 500L water/Ha
Fertigation: 5L/ha

For best results, apply before the start of stress period for stronger and healthier plants.
