

# ROOT PROMOTER

## • *Best for seedling support*

Seawin's **ROOT PROMOTER** is derived from the brown kelp Laminaria (Saccharina) japonica. With 20% seaweed extract, it is rich in major nutrients like nitrogen, phosphorous and potassium, and secondary & trace elements.

Packaging Sizes: 20L, 1000L

### Product Features

- Increases crop survival rate after transplanting
- Promotes fast growth of plant root system
- Increase root resistance to stress and disease
- Increase microbe activities and improves soil health

### Product Analysis

Nitrogen (N).....	6%
Phosphorous (P).....	1.1%
Potassium(K).....	5%
Iron(Fe).....	0.14%
Boron(B).....	0.18%
Zinc (Zn).....	0.2%
Seaweed Extract.....	20%
Organic Matter.....	10%

### Seawin's Advantage

Patented multi-step enzymatic extraction method extracts consistent and high quality polysaccharide, which brings the following benefits:

- Natural chelating agent
- Soil buffering agent
- Bio-stimulant properties
- Reduces stress and aids recovery
- Improves soil structure

### Physical Characteristics

Brown liquid, pH 6 – 8,  
Specific Gravity 1.15-1.20

### Application

#### Fertigation:

Apply 2-4L/ha. Apply after transplanting or after dormancy period. Best to be applied together with other nutrition.

#### Root Dipping:

Dip plants before being transplanting onto the growing media/into the soil.

For application suggestions specific to your crop, please contact your local agronomist or Seawin's distributors.
