

# Granular NPK

16-4-16.7

- NPK General purpose fertilizer with Seaweed chelating extract***

Seawin's biological enhanced compound **N:P:K (16-4-16.7)** is a combination of Nitrogen, Phosphorus, Potassium and Seawin's Polysaccharides. The added Polysaccharide is a natural chelating agent and can greatly enhance the uptake and absorption of these nutrients.

Packaging Size: 40kg

## Product Features

- Enhance fruit coloration and expansion, increase sweetness
- Make fruit size and color more uniform
- Better yield and quality
- Improve soil structure
- Added Oligosaccharide to increase utilization rate of nutrition

## Product Analysis

Nitrogen(N)

as nitrate .....	13%
as Ammonia .....	3%
Total .....	16%
Phosphorus(P).....	4%
Potassium(K).....	16.7%

## Organic Inputs

Seaweed Polysaccharides.....1000ppm

*This product contains equivalent of 5L of liquid seaweed extract per 100 kg. (0.5% w/w of Seawin's SeaGreen Extra)*

## Seawin's Advantage

Patented multi-step enzymatic extraction method extracts consistent and high quality Polysaccharide, which brings the following benefits:

- Natural chelating agent
- Soil buffering agent
- Bio-stimulant properties
- Reduces stress and aids recovery
- Improves soil structure

## Physical Characteristics

Granular

## Application

150-600kg/ha

For application suggestions specific to your crop, please contact your local agronomist or Seawin's distributors.
