

SEAWIN AMINOCAL

Allowed Input
Cert. No. 19013

Approved to use in
Organic Agricultural System

• *Amino Acid chelated Calcium*

A high calcium concentrate to prevent and correct calcium deficiencies in crops.

The Calcium is in a plant available form for good absorption, with very low nitrogen.

Packaging Sizes: 10L, 20L

Product Features

Amino Acid chelated Calcium:

- Increase the absorption and translocation of Ca within plant tissues for maximum nutritional benefits

3% Polysaccharide added:

- A natural chelating agent, greatly enhances the absorption of Calcium
- Promotes photosynthesis and stimulates plant growth

Product Analysis

Calcium.....	14.8%
L-free Amino Acids.....	10.7%
Polysaccharides.....	3%
Organic Matter.....	10.7%
Total Nitrogen(Organic).....	1.3%

All nutrients represented in w/v.

Seawin's Polysaccharide (Alginic acid)

Patented multi-step enzymatic extraction method extracts consistent and high quality polysaccharide, which brings the following benefits:

- Natural chelating agent
- Soil buffering agent
- Bio-stimulant properties
- Reduces stress and aids recovery

Physical Characteristics

Liquid, pH 4-6, Specific Gravity 1.5

Application

Fertigation: 25-100L/ha

Foliar: 5-10 L/ha

'Jar Test' needed for compatibility testing if applying with other products.

For application suggestions specific to your crop, please contact your local agronomist or Seawin's distributors.
