

Suspension Mg

• *High Magnesium Content*

Seawin's **SUSPENSION Mg** is designed specifically to correct magnesium deficiencies at planting, or at any time during the growing season. Magnesium is a key component of chlorophyll. Without magnesium, the plant cannot produce chlorophyll, which will cause photosynthesis to suffer.

Packaging Size: 20L

Product Features

- Neutralize acid soil
- Control and release magnesium slowly
- Supplement long term magnesium

Product Analysis

MgO.....50%

Physical Characteristics

Brown liquid, pH 10-11

Seawin's Advantage

- High Mg content, nanometre level nutrition
- Good compatibility, can compound with macro elements with no sediment
- Easy to absorb

Application

Fertigation: 0.5-1 L/ha
Foliar: 2-4 L/ha.

For application suggestions specific to your crop, please contact your local agronomist or Seawin's distributors.
