

# Amino Acid Powder

Allowed Input  
Cert. No. 19013

Approved to use in  
Organic Agricultural System

**AMINO ACID** is an organic fertiliser and stimulant that contains natural chelating agents that ensure nutrients and minerals are in readily available forms.

Amino acid provides a number of benefits to both plant and soil health, including improved soil buffering capacity, greater plant root growth, higher plant stress tolerance, improved fertiliser efficiency and uptake of other inputs, enhanced cell division and greater yields.

## Seawin's Advantage

Extracted from fish skin using advanced enzymolysis, light weight molecules to provide bio-stimulant properties.

Total free amino acid, can be absorbed by plants more quickly and has strong functions such as aid in the completion of the enzyme production, improved soil buffering capacity, greater plant root growth, higher plant stress tolerance, improved fertiliser efficiency and uptake of other inputs, enhanced cell division and greater yields.

## Product Features

- Organic source of naturally nitrogen
- Very easy to handle. Soluble in water in just moments
- No soil leaching, phytotoxicity (plant burn) or risk of salt accumulation
- Compatible with many other materials
- Nutrient rich in amino acids and peptides
- Improves uptake of both inorganic and organic forms of nitrogen

## Product Analysis:

Amino Acid Powder.....40-45%  
N.....≥17%  
Chloride.....≤32%

## Physical Characteristics:

Light beige power, pH 3-5,  
100% water soluble

## Application:

**Foliar Spray:** 1-2 L/ha

**Irrigation:** 4-8 L/ha

For application suggestions specific to your crop, please contact your local agronomists or Seawin's distributors.

## Packaging Sizes: 25kg
