

Humic Acid Potassium

Allowed Input
Cert. No. 19013

Approved to use in
Organic Agricultural System

HUMIC ACID POTASSIUM is primarily used to improve soil quality, and is also used as a raw material in formula fertilizers, if it is not used directly.

HUMIC ACID POTASSIUM powder is a type of black powder, and as an important component for plant nutrition and physiologically active matter, it is used in conjunction with chemical fertilizers to improve soil quality and stimulate the crop growth.

Product Features

• Soil conditioner

- Increase the CEC of the soil and improve soil microbe activity by providing the organic carbon for beneficial fungi and bacteria;
- Adjust the PH of soil, buffer toxic chemicals and heavy metals.
- Natural chelating and complexing agent, stable the nitrogen and keep the phosphorus improve efficiency of nitrogen and phosphorus.

• For plants

- Speed up the photosynthesis as Potassium is an important component of chlorophyll;
- Increases plant uptake of essential nutrients through foliar and root application;
- Improves blossom and fruit set;
- Enhance plants and crops natural resistance to disease and adverse conditions such as heat, drought and frost
- Improve healthy root development and stimulates cell elongation and division Potassium humate flake.

Product Analysis

HA(Dry Basis).....	≥90%
K ₂ O.....	≥8%
Moisture.....	≤20%
Insoluble Substance.....	≤2%

Physical Characteristics

Black flake; pH 8-10

Application

For application suggestions specific to your crop, please contact your local agronomists or Seawin's distributors.

Packaging Sizes: 25kg
