

Wahed FTSE USA Shariah ETF (HLAL)
Listed on The NASDAQ Stock Market LLC

Summary Prospectus
September 30, 2026

<https://www.wahed.com/hlal>

Before you invest, you may want to review the Fund's prospectus and statement of additional information ("SAI"), which contain more information about the Fund and its risks. The current prospectus and SAI dated September 30, 2026, are incorporated by reference into this Summary Prospectus. You can find the Fund's prospectus, reports to shareholders, and other information about the Fund online at <https://www.wahed.com/hlal>. You can also get this information at no cost by calling 1-855-976-4747 or by sending an e-mail request to ETF@usbank.com.

Investment Objective

The Wahed FTSE USA Shariah ETF ("FTSE USA ETF" or the "Fund") seeks to track the total return performance, before fees and expenses, of the FTSE Shariah USA Index (the "Index").

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund ("Shares"). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees <i>(fees paid directly from your investment)</i>	None
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fee	0.50%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.50%

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year: \$51 **3 Years:** \$160 **5 Years:** \$280 **10 Years:** \$628

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund's performance. For the fiscal year ended May 31, 2026, the Fund's portfolio turnover rate was 19% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to track the total return performance, before fees and expenses, of the Index. The Index is composed of common stocks of large- and mid-capitalization U.S. companies the characteristics of which meet the requirements of Shariah and are consistent with Islamic principles as interpreted by subject-matter experts (each, a "Shariah-compliant company").

FTSE Shariah USA Index

The Index is constructed using an objective, rules-based methodology and is comprised of those companies included in the FTSE USA Index that are determined to be Shariah-compliant companies based on their business activities and certain financial ratios, as described below. The Shariah-compliant companies are then weighted in the Index according to their market capitalization.

Companies that receive income in excess of 5% of their total revenue from Shariah-prohibited activities are removed from the list of companies eligible for inclusion in the Index. Examples of such activities include:

- Conventional finance (non-Islamic banking, finance and insurance, etc.);
- Alcohol production or sale;
- Pork-related products and non-halal food production, packaging, and processing or any other activity related to pork and non-halal food;
- Casino management, gambling, or adult entertainment;
- Tobacco manufacturing or sale; and
- Weapons, arms, and other defense manufacturing.

Only those companies that pass the following financial ratios will be considered Shariah-compliant:

- Debt is less than 33.333% of total assets;
- Cash and interest-bearing items are less than 33.333% of total assets;
- Accounts receivable and cash are less than 50% of total assets; and
- Total interest and non-compliant activities income should not exceed 5% of total revenue.

The Index constituents are reviewed on an ongoing and annual basis to ensure that they continue to be Shariah-compliant companies. The Index is reconstituted quarterly. If it is discovered during an ongoing review that a non-compliant security has been included in the Index in error, the security is removed from the Index and the Fund within two business days following the discovery of the error. The Index's constituent securities are also reviewed on both an ongoing basis and annual basis by a Shariah consultant, Yasaar Limited, to determine if any of the constituents should be considered for potential income remediation or "Purification." Purification is the process by which an investor donates certain income earned from his or her investment in the Fund because certain of the Fund's investments unintentionally earned small amounts of income deemed to be prohibited by Shariah principles, such as interest income. As discussed under "Dividend Purification," the Fund publishes on its website the per share amount to be purified on a quarterly basis.

The Fund's Investment Strategy

The Fund attempts to invest all, or substantially all, of its assets in the component securities that make up the Index. Under normal circumstances, at least 80% of the Fund's net assets, plus borrowings for investment purposes, will be invested in the component securities of the Index. Wahed Invest LLC (the "Adviser"), the Fund's investment adviser, expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a "replication" strategy to achieve its investment objective, meaning the Fund generally will invest in all of the component securities of the Index in approximately the same proportions as in the Index. However, the Fund may use a "representative sampling" strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations such as tax diversification requirements that apply to the Fund but not to the Index).

The Fund generally may invest up to 20% of its total assets in securities or other investments not included in the Index, but which comply with Shariah principles and which the Adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions). The Fund may also invest up to 20% of its total assets in cash and other investments, such as cash equivalents and shares of other investment companies, each of which will be compatible with Shariah principles. Uninvested monies will be held in non-interest-bearing accounts.

To the extent the Index concentrates (i.e., invests more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index. As of June 22, 2026, the Index, and likewise the Fund, were concentrated in the Semiconductors & Semiconductor Equipment Industry. The Fund is deemed to be "non-diversified," which means that it may invest a greater percentage of its assets in the securities of a single issuer or a small number of issuers than if it was a diversified fund. The Fund may, from time to time, have significant exposure to one or more sectors of the market. As of May 31, 2026, 59.4% of the Fund's net assets were invested in securities within the Manufacturing Sector.

As of July 31, 2026, the Index had 211 constituents, and the four largest stocks and their weightings in the Index were Nvidia Corp. (12.33%), Apple, Inc. (11.76%), Microsoft Corp. (9.09%) and Alphabet Inc. Class A (5.46%).

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value (“NAV”), trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your investment in the Fund:

- **Shariah-Compliant Investing Risk.** The consideration of Islamic principles restricts the Fund’s ability to invest in certain types of issuers and securities, such as financial companies and conventional fixed income securities (bonds and other structured securities that give a fixed return based on an obligation or promise), and reduces the size of the universe of eligible securities in which the Fund can invest. As a result, the successful implementation of the Fund’s investment strategy may limit its investment opportunities and adversely affect its performance, especially in comparison to a more diversified fund. Because Islamic principles preclude investment in interest-paying instruments, any cash or cash equivalents the Fund holds will not earn interest income.
- **Concentration Risk.** Because the Fund’s assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries.
 - *Semiconductors & Semiconductor Equipment Industry Risk.* Semiconductor companies may have limited product lines, markets, financial resources or personnel. Semiconductor companies typically face intense competition, potentially rapid product obsolescence and high capital costs and are dependent on third-party suppliers and the availability of materials. They are also heavily dependent on intellectual property rights and may be adversely affected by loss or impairment of those rights. Semiconductor companies are also affected by the economic performance of their customers.
- **Underlying Index Risk.** Neither the Adviser nor FTSE International Limited (the “FTSE Index Provider”), the index provider and calculation agent for the Index, is able to guarantee the continuous availability or timeliness of the production of the Index. The calculation and dissemination of the Index values may be delayed if the information technology or other facilities of the FTSE Index Provider, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the FTSE Index Provider or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. Index providers generally do not provide any representation or warranty in relation to the quality, accuracy or completeness of data in the indexes in which they license, and generally do not guarantee that an index will be calculated in accordance with its stated methodology. Losses or costs associated with any index provider errors generally will be borne by the Fund and its shareholders.
- **Equity Securities Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, sectors or companies in which the Fund invests. Equity securities such as common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Preferred stocks are subject to the risk that the dividend on the stock may be changed or omitted by the issuer, and that participation in the growth of an issuer may be limited.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund’s NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, government actions or interventions (including, but not limited, to the threat or imposition of tariffs, trade restrictions, currency restrictions or similar actions) as well as developments related to economic, political (including geopolitical), social, public health, market, extreme weather, natural or man-made disasters, or other conditions or events have in the past and may in the future result in volatility in financial markets and reduced liquidity in equity, credit, and/or debt markets, which could adversely impact the Fund and its investments and their value and performance. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets.
- **Market Capitalization Risk.**
 - *Large-Capitalization Investing Risk.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and, therefore, subject to slower growth during times of economic expansion. Large-capitalization companies also may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
 - *Mid-Capitalization Investing Risk.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-

capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.

- **Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors. The Fund may invest a significant portion of its assets in the following sectors and, therefore, the performance of the Fund could be negatively impacted by events affecting each of these sectors.
 - *Manufacturing Sector Risk.* Companies in the Manufacturing Sector may be involved in the manufacturing of electronic components, systems, and equipment used across consumer, industrial, communications, automotive, aerospace, and medical applications. These companies can be significantly affected by supply and demand both for their specific product or service and for Manufacturing Sector products in general; a decline in demand for products due to rapid technological developments and frequent new product introduction; government regulation (such as trade restrictions, export controls, and environmental standards), world events and economic conditions; and the risks associated with potential environmental damage and product liability claims. Additionally, certain industries within the sector, such as those related to electronic components and semiconductors, may face risks from fluctuating raw material prices, shortages of critical inputs such as semiconductors and rare earth elements, and reliance on contract manufacturers or overseas suppliers.
- **ETF Risks.** The Fund is an exchange-traded fund (“ETF”), and, as a result of its structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. Shares may trade at a material discount to NAV and possibly face delisting if either: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares Risk.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV Risk.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
 - *Trading Risk.* Although Shares are listed for trading on The NASDAQ Stock Market, LLC (the “Exchange”) and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than the Shares.
- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.
- **Passive Investment Risk.** The Fund is not actively managed and its Adviser would not sell shares of an investment designed to provide exposure to the Index or a constituent holding of the Index due to current or projected underperformance of a security industry or sector unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology.

Performance

The performance information presented below provides some indication of the risks of investing in the Fund by showing the extent to which the Fund’s performance can change from year to year and over time. The bar chart below shows the Fund’s performance for the most recent calendar years ended December 31. The table illustrates how the Fund’s average annual returns for the 1-year, 5-year, and since inception periods compare with those of the Index and the S&P 500® Index, a broad-based securities market index intended to

represent the overall domestic equity market. The Fund’s past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Updated performance information is available on the Fund’s website at <https://www.wahed.com/hlal>.

The Fund’s calendar year-to-date total return as of June 30, 2026, was 15.53%. During the period shown in the bar chart, the highest quarterly return was 23.83% for the quarter ended June 30, 2020, and the lowest quarterly return was -21.02% for the quarter ended March 31, 2020.

**Average Annual Total Returns
(for periods ended December 31, 2025)**

Wahed FTSE USA Shariah ETF	1-Year	5-Years	Since Inception (7/15/2019)
Return Before Taxes	18.47%	13.75%	16.15%
Return After Taxes on Distributions	18.30%	13.54%	15.89%
Return After Taxes on Distributions and Sale of Shares	11.03%	11.00%	13.22%
S&P 500® Index (reflects no deduction for fees, expenses, or taxes)	17.88%	14.42%	15.32%
FTSE Shariah USA Index (reflects no deduction for fees, expenses, or taxes)	19.05%	14.33%	16.77%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account (“IRA”) or other tax-advantaged accounts. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

Portfolio Management

<i>Adviser</i>	Wahed Invest LLC
<i>Portfolio Manager</i>	Samim Abedi, Chief Investment Officer for the Adviser, has been the portfolio manager of the Fund since its inception in 2019

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through a broker or dealer at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. The difference in the bid and ask prices is referred to as the “bid-ask spread.”

Recent information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at <https://www.wahed.com/hlal>.

Tax Information

The Fund's distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is held in an IRA or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
