BRAND & PARTNER COMPATIBILITY

Lutron Electronics®
Lutron Palladiom Shading System®

As a proud Lutron Platinum Dealer, NY City Blinds brings you Lutron's sophisticated smart home technology for window treatments—the ultimate in style, convenience, and class.

Somfy Systems®
Somfy TaHoma® Hub System

NY City Blinds offers expert supply and integration of Somfy motorization. Our in-house electricians install their innovative wired and battery solutions for all window treatments.

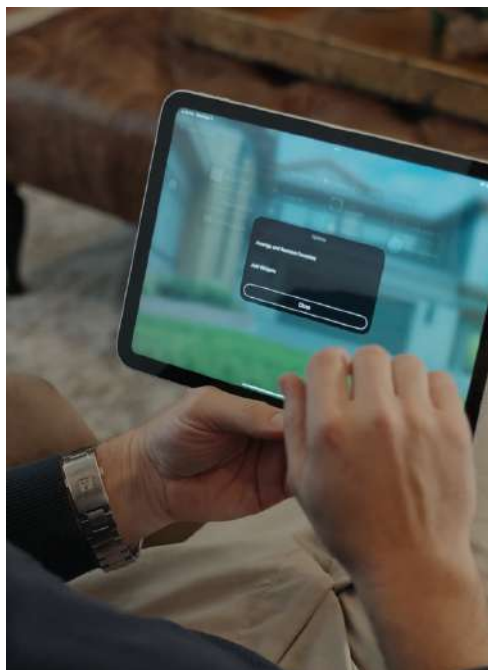

Hunter Douglas®
Duette® Honeycomb Shades

As a trusted Northeast retailer for Hunter Douglas, NY City Blinds offers an unparalleled selection of their finest window coverings, materials, and styles.

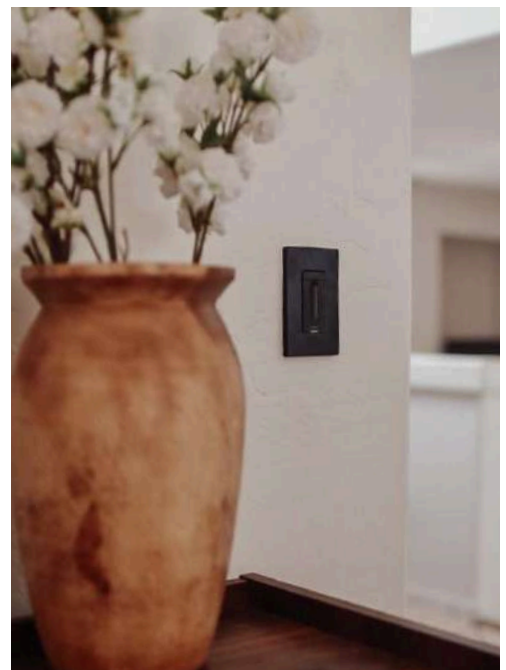

Rollease Acmeda®
Tusk® Textstyle Solar Fabric Swatches

We partner with Rollease Acmeda for precision motorization and hardware. Using their systems with Textstyle® fabrics, NY City Blinds delivers complete, high-quality automated shade solutions.

Control 4®
Control4 Touchscreen®

Control4 is the ultimate smart home solution. It offers seamless control of lighting, security, HVAC, and audio, and integrates over 35,000 devices using protocols like Zigbee and Z-Wave.

Brilliant Tech®
Smart Dimmer Switch®

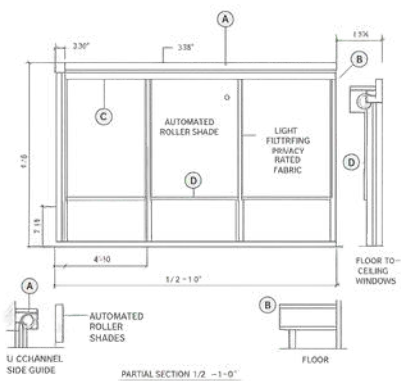

Brilliant is an easy-to-install, in-wall control system. It seamlessly integrates top smart home brands to manage lighting, security, climate, music, and more, making any home intelligent and easy to use.

CASE STUDY I

THE CHALLENGE

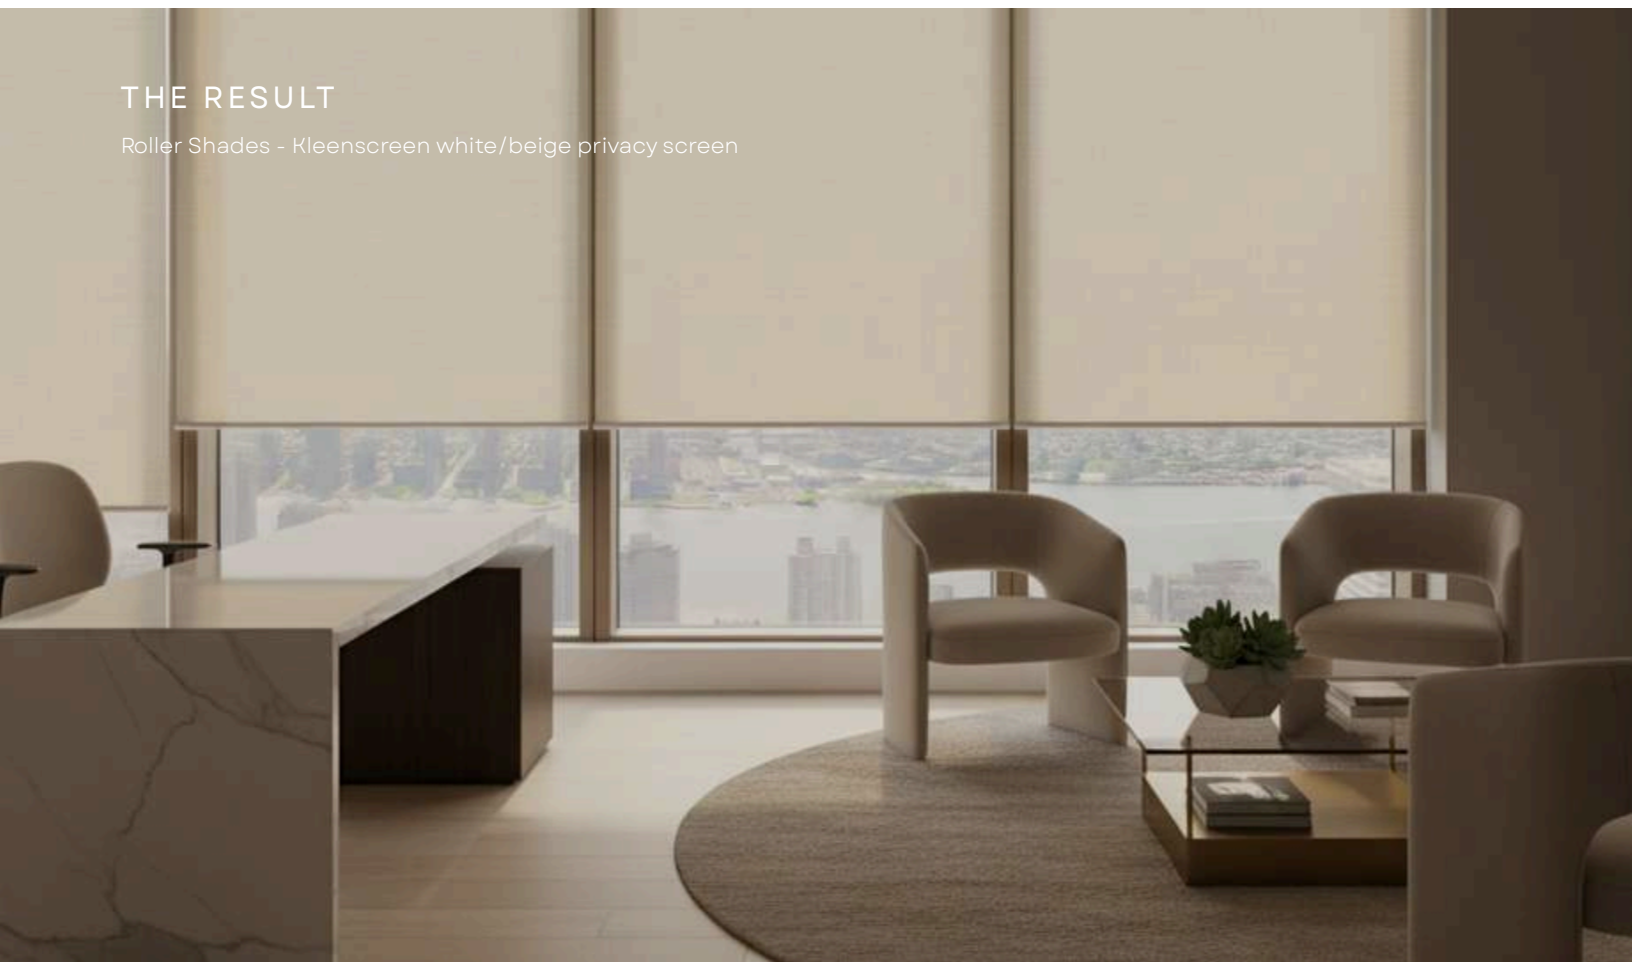

The client's Upper East Side office required a fully automated shading solution that eliminated any need for manual operation in the lounge room. Shades needed to raise automatically each morning at 9:00 AM and lower on their own at 6:00 PM, creating a consistent daily rhythm without user intervention. At the same time, the space needed to remain bright and naturally lit while preventing exterior visibility into the office, eliminating silhouettes or visual access from outside. The solution also had to remain intentionally simple and minimal, avoiding layered treatments, drapery, or complex systems, while delivering both privacy and daylight control seamlessly.

THE SPECS

THE RESULT

Roller Shades - Kleenscreen white/beige privacy screen

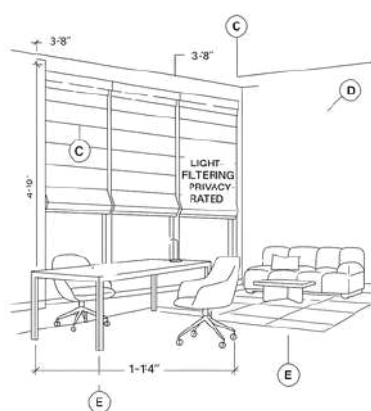

CASE STUDY II

THE CHALLENGE

For this Long Island residence, the client was designing an at-home office and sought a shading solution that felt refined and intentional rather than purely utilitarian. She wanted to maintain a clean, minimal aesthetic while giving the windows a sense of architectural presence, avoiding anything that felt overly basic or standard. The solution needed to provide soft daylight through a light-filtering fabric while functioning as a cohesive, whole-room shading system that enhanced the space without overpowering it.

THE SPECS

PROJECT SCALE 1/2" = 1'-0"

THE RESULT

Roman Shades - IFI Premier Natur

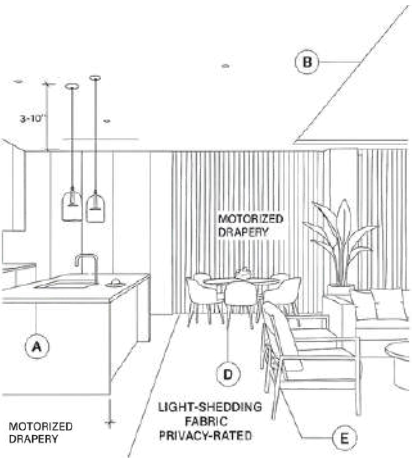

CASE STUDY III

THE CHALLENGE

The client resides in a top-floor penthouse in DUMBO, Brooklyn, featuring expansive floor-to-ceiling windows wrapping the entire space. While the home has a modern foundation, the overall aesthetic leans warm and contemporary. Traditional roller shades felt too minimal and industrial for the atmosphere she had created and risked disrupting the sense of comfort and softness within the home. The challenge was to design a shading solution that felt light, airy, and truly tailored to the space, while still delivering full functionality. The client required motorized operation for ease of use, independent control of each opening, and the flexibility to open certain areas while maintaining privacy in others. Equally important was selecting a luxurious fabric that provided elegance and performance without appearing heavy or overpowering.

THE SPECS

THE RESULT

Motorized Sheer Drapery - Pinch Pleat Sheer Drapes, Quiet White

TESTIMONIALS FROM TRADE PARTNERS

Braden Johnson
Real Estate Agent

NY City Blinds delivered a dual drapery solution with sheer and blackout layers for a Midtown apartment featuring surrounding windows. They carefully coordinated fabric selection and functionality to allow for daytime light and privacy, as well as full blackout when needed. The result is a seamless, elegant system that provides flexibility, comfort, and a cohesive look throughout the home.

Southampton, New York | Bamboo Woven Shade

Samantha Guiler
Interior Designer

The team helped us design a custom Roman shade solution for a SoHo office that required privacy without fully blocking natural light. They guided the fabric selection and detailing to maintain a clean, professional aesthetic while meeting functional needs. The result was a refined workspace that feels bright, private, and thoughtfully designed.

SoHo, Manhattan | Aventura Roman Shade

Marina Rossi
Real Estate Agent

NY City Blinds delivered a beautifully executed woven shade solution for a Hamptons bathroom where privacy and natural texture were key. They helped select a material that filtered light while maintaining privacy and withstanding the humid environment. The final result feels effortless, elevated, and perfectly suited to the space.

Southampton, New York | Bamboo Woven Shade

Grace Domenico
Interior Designer

NY City Blinds provided a refined roller shade solution for a dining room that balanced light control with a clean, tailored look. They helped select a fabric that softened natural light without overpowering the space, resulting in a solution that feels cohesive, functional, and design-forward.

Williamsburg, Brooklyn | Light Filtering Roller Shades

Jonathan Bolik
General Contractor

NY City Blinds designed and installed sheer ripple fold drapery for a living room that required softness, movement, and light control without blocking natural daylight. Their attention to fabric selection and detailing resulted in an elegant, airy solution that enhanced the space while maintaining a refined, finished look.

Upper East Side, Manhattan | Ripple Fold Sheer Drapery

Matthew Green
Real Estate Agent

NY City Blinds was an essential partner on a project where our client wanted her window treatments fully integrated with her Lutron lighting system. Their recommendation of the Lutron Palladiom shading system, along with their technical guidance and coordination, made the process seamless. The result was a refined, fully synchronized solution that elevated the entire space and exceeded our client's expectations.

Midtown, Manhattan | Lutron Palladiom Shading System®

Sylas Beaumont
Interior Designer

NY City Blinds executed a neutral pinch pleat drapery solution for a summer home in Montauk, creating a relaxed, European-inspired aesthetic throughout the space. Despite the diversity and scale of the project, their team maintained a cohesive vision, carefully balancing texture, proportion, and functionality. The result is an effortless, elevated look that perfectly complements the home's coastal character.

Montauk, New York | Pinch Pleat Sheer Drapery

Ashley Nadar
Real Estate Agent

NY City Blinds provided a custom blackout shade solution for a NoHo bedroom, delivering complete light control without compromising the room's design. Their attention to fabric selection and detailing resulted in a clean, tailored look that enhances comfort and creates an ideal sleep environment.

NoHo, Manhattan | Blackout Roller Shades

Jackson Seler
General Contractor

NY City Blinds completed a full-home plantation shutter installation for a Long Island townhouse, delivering a timeless and cohesive look throughout the residence. Their attention to proportion, finish, and functionality ensured each space felt both polished and practical, resulting in a classic solution that elevated the entire home.
