

Painting Gloves PG403

Product Code: PG403

The PG403 Painter's Glove was designed for anyone who requires maximum sensitivity, protection, and comfort during painting and fine-detail work. The seamless nylon/spandex lining offers excellent elasticity and fit, allowing the glove to move naturally with your hand and reducing fatigue even during extended tasks. The palm and fingers are coated with durable nitrile, providing reliable protection against water- and solvent-based paints without compromising tactile sensitivity. With its 15-gauge construction, the PG403 ensures maximum precision and a lightweight feel—perfect for delicate brushwork, spray painting, masking, and detailed finishing tasks. Whether painting walls and furniture at home, carrying out renovation projects, or working on vehicle finishes, the PG403 Painter's Glove delivers the ideal combination of fingertip sensitivity, comfort, and chemical protection for professional results.
