

Painting Gloves PG401

Product Code: PG401

The PG401 Painter's Glove was designed for anyone who needs precision, comfort, and protection during painting and fine-detail work. The seamless polyester lining provides breathable comfort, supports natural hand movement, and reduces fatigue even during extended tasks. The durable PU coating increases abrasion resistance without compromising flexibility—ideal for repeated use with brushes or rollers, as well as surface preparation. With its 13-gauge construction, the PG401 offers maximum sensitivity and control, allowing tools, spray equipment, and delicate materials to be handled with precision. Whether painting walls or furniture at home, carrying out small renovation projects, touching up vehicle paint, or creating artistic details, the PG401 Painter's Glove delivers the perfect combination of protection, comfort, and fingertip sensitivity.
