

PRESS RELEASE

Priverion is included as a Major Player in IDC MarketScape: Worldwide Data Privacy Compliance Software 2025 Vendor Assessment

21. November, 2025 — Priverion is thrilled to announce its recognition as a Major Player in the IDC MarketScape: Worldwide Data Privacy Compliance Software 2025 Vendor Assessment (doc # US53068725, November 2025)

"We believe being recognized in the IDC MarketScape is a testament to the significant impact our platform has had on our customers and the problems we are solving. We are happy that our approach and differentiators resonate well with the market. We are excited about our commitment to innovation and look forward to introducing new value-driving features for our customers." stated Dr. Dominic Staiger, CEO of Priverion.

Priverion is recognized with its differentiators including Time Machine capability and Model Context Protocol (MCP).

Priverion is a privacy and information security operations platform for organizations that want to move beyond scattered spreadsheets and point tools. It brings PrivacyOps and InfoSec together in one place, so teams can document, manage, and continuously improve their compliance and risk posture across entities and vendors. Designed for medium to large organizations with shared services, Priverion gives a group-wide view of maturity, helps prioritize risk and remediation and provides the workflows and libraries companies need to keep pace with evolving regulations and standards.

About IDC MarketScape

IDC MarketScape vendor assessment model is designed to provide an overview of the competitive fitness of ICT (information and communications technology) suppliers in a given market. The research methodology utilizes a rigorous scoring methodology based on both qualitative and quantitative criteria that results in a single graphical illustration of each vendor's position within a given market. IDC MarketScape provides a clear framework in which the product and service offerings, capabilities and strategies, and current and future market success factors of IT and telecommunications vendors can be meaningfully compared. The framework also provides technology buyers with a 360-degree assessment of the strengths and weaknesses of current and prospective vendors.
