

WORKWAVE[®]

TRANSFORM YOUR DATA MANAGEMENT WITH OUR CURATED DATA WAREHOUSE

Wavelytics' Data Factory provides an all-in-one solution to streamline data management with a scalable, ready-to-use platform. Through Snowflake's secure data share, live data can be seamlessly accessed to build comprehensive analytics with your own BI tools and integrated into other data sources. This innovative approach simplifies data operations and data engineering to unlock deeper insights for your business.

DATA FACTORY FEATURES

- ✓ **EMBEDDED LOGIC:** Built-in analytics logic means no time spent building and testing from scratch — get straight to actionable insights.
- ✓ **NEAR REAL-TIME:** Benefit from near real-time data processing, enabling faster, data-driven decision-making.
- ✓ **TRANSPARENCY:** Our solution is fully documented with exposed logic to avoid the “black box” effect, giving you complete visibility and control over your data processes.
- ✓ **HISTORY TRACKING:** Our solution tracks changes to data so historical lookback is seamless and available for reporting or analytics.

READY TO USE CURATED DATA WAREHOUSE BENEFITS:

ACCELERATED TIME TO MARKET

Pre-built solutions reduce deployment time and development time.

CONTINUOUS MAINTENANCE & UPDATES

Get ongoing maintenance updates driven by customer's needs.

BUILT WITH INDUSTRY BEST PRACTICES

We ensure optimal performance, data security and privacy compliance.

REDUCED ENGINEERING COSTS

Minimizes the need for substantial in-house engineering resources.
