STRATEGIES AND RISK MANAGEMENT

Strategies

The hotel, residential, and commercial properties owned by the Company provide an income stream and capital appreciation that is utilized for acquisitions, investments in development properties, reduction of debt, and payment of dividends to the Company's shareholders. At present, the Company owns and manages 934 hotel units (188 at the Westin Wall Centre, Vancouver Airport, and 746 at the Sheraton Vancouver Wall Centre). It also owns and manages 1,523 residential and commercial rental units located in Metro Vancouver.

The Company develops for sale residential housing units with a primary focus on high-rise multi-family projects. It is the Company's strategy to acquire land for development that is zoned for its intended use or where the required rezoning is contemplated and encouraged by the governing authorities. There are two properties under active development as at April 30, 2023: Eagle Mountain subdivision in Abbotsford, B.C. and the Trails project in the City of North Vancouver, B.C.

Risk Management

All real estate investments are subject to a degree of risk and uncertainty. In the normal course of its business, the Company is exposed to various risks that could adversely impact the Company's financial condition, results of operations, and the value of the Company's common shares. A description of some of these risks and the Company's actions are summarized below. The risks set out below are not the only risks faced by the Company. Other risks and uncertainties may also affect our business, financial condition and results of operations.

General risks

We are exposed to the micro- and macro-economic conditions that affect the markets in which the Company operates and owns assets. In general, a decline in economic conditions will result in downward pressure on the Company's margins and asset values as a result of lower demand for the services and products offered by the Company. Specifically, the following factors could pose a threat to our ongoing business operations: general inflation and interest rate fluctuations; population growth and migration; job creation and employment patterns; consumer confidence; government policies, regulations and taxation; and availability of credit and financing.

National and international economic forces and conditions will impact the Company's hotel business as a significant portion of the Company's hotel business is from conventions and tourists from across Canada, the US, and internationally. The Company adapts its business plans to reflect current conditions and management believes that the Company has sufficient resources to carry its operations through uncertain times.

The Company participates in joint arrangements under the normal course of business that may have an effect on certain assets and businesses. These joint arrangements may involve risks that would not otherwise be present if the third parties were not involved, including the possibility that the partners have different economic or business interests or goals. Also, within these arrangements, the Company may not have sole control of major decisions relating to these assets and businesses, such as: decisions relating to the sale of the assets and businesses; timing and amount of distributions of cash from such entities to the Company and its joint arrangement partners; and capital expenditures.

Industry risks

Real estate investments are generally subject to varying levels of risk. These risks include changes to general economic conditions, government and environmental regulations, local supply/demand, and competition from other real estate companies. Real estate assets are relatively illiquid in down markets, particularly raw land. As a result, the Company may not be able to quickly rebalance its portfolio in response to changing economic or investment conditions. Management attempts to manage these risks by acquiring properties with strong economic and growth indicators, and ensuring the Company has adequate capital and liquidity to enable the Company to deal with fluctuating markets and ongoing changes in the economic environment.

Concentration of assets risk

The majority of the Company's assets are located in Metro Vancouver. Adverse changes in economic conditions in Metro Vancouver may have a material adverse effect on the Company's business, cash flows, financial condition and results of operations, and ability to pay dividends. The Metro Vancouver economy is influenced by the demand for new housing in the region, which is impacted by interest rates, growth in employment, migration, and general economic conditions. Various government bodies (including the Canadian federal government, the British Columbia provincial government and the Vancouver municipal government) are exploring or enacting legislation and regulations that are intended to have an impact on the real estate industry, which could result in negative impacts on the Company and its assets.

Investment properties

Investing in properties involves the risk that the actual performance of these acquisitions may be materially different from the assumptions made in purchasing the properties, which could have a material adverse effect on the Company's business, financial condition, prospects or results of operations. In its operation of residential rental properties, the Company's primary risks are general economic conditions and local market conditions, reduced revenue growth in the event of increased vacancy rates, the inability to increase rental

rates due to oversupply, restrictive government legislation or changes to government legislation, and the failure to maintain the properties at a competitive level.

The Company manages these risks by insisting on a high standard of maintenance and invests only in those locations highly desired by tenants. Over the past year, vacancy rates have decreased and rents are increasing substantially on unit turnover. Operating costs such as property taxes, utilities, and insurance are also increasing.

Hotels

In its hotel operations, the Company is exposed to a variety of risks such as changes in market and economic conditions, an increase in the supply of hotel rooms, currency rate fluctuations, and changes in the labour market. These risks are managed by securing long-term relationships with clients, developing and enhancing relationships with international hotel chains and their reservation systems, and ensuring a strong and open relationship with staff.

Properties under development

There are a variety of risks associated with the Company's development activities such as municipal regulatory requirements and environmental considerations that affect the approvals for planning and subdivision and use of land. During this period, the market conditions in general and/or the market for condominium units in the size and price range in the Company's developments may change dramatically. Other risks include increasing costs of construction, reduced demand for new residential units, changes in regulations and taxes, and general market risk. The Company is also subject to risk that the actual performance of properties acquired by the Company may be materially different from the assumptions made by management of the Company when purchasing the properties.

The Company manages the risks associated with its development activities as follows:

- Acquiring land for development that is zoned for its proposed use or where the required re-zoning is contemplated and encouraged by the governing authorities.
- Managing construction costs through fixed-price contracts with general contractors or sub-contractors.
- Undertaking pre-sale programs where feasible and securing the sales with non-refundable deposits.
- Encouraging purchasers to secure and lock-in purchase financing.

Disease outbreak

A local, regional, national or international outbreak of a contagious disease, including, but not limited to, the COVID-19 pandemic or any other illness could result in: a general or acute decline in economic activity in the regions the Company operates in; a decrease in the willingness of the general population to travel; staff shortages; reduced tenant traffic; mobility restrictions and other quarantine measures; supply shortages; increased government regulation; and the quarantine or contamination of one or more of the Company's apartment units, hotels or buildings. Contagion in one of the Company's buildings or a market in which the Company operates could negatively impact the Company's occupancy, its reputation or attractiveness of that market. Public health crises, pandemics and epidemics could also adversely impact the Company's tenants' ability to meet their payment obligations, impact the ability of purchasers of units to satisfy their purchase obligations or disrupt supply chains and transactional activities that are important to the Company's construction and development activities, in addition to negatively impacting local, national or global economies. To mitigate this risk, management closely monitors all evolving disease outbreaks, epidemics or pandemics, including the COVID-19 pandemic and proactively raises its level of preparedness planning to adapt

its operations as risk levels rise. With regard to the specific COVID-19 pandemic, management is actively involved in business continuity and pandemic planning to monitor the evolving circumstances.

Environmental matters

As an owner of real property, the Company is subject to various federal, provincial and municipal laws, and other requirements relating to environmental matters. Under such requirements, the Company could be liable for the costs of removal of certain hazardous substances and remediation of certain hazardous substances. The failure to remove or remediate such substances, if any, could adversely affect the Company's ability to sell such real estate or to borrow using such real estate as collateral and could potentially also result in the Company incurring expenses, including in connection with orders or claims against the Company. The Company is not aware of any material non-compliance with environmental requirements at any of its properties or otherwise affecting the Company or its business. The Company is also not aware of any pending or threatened investigations or actions by environmental regulatory authorities in connection with any of its properties or otherwise affecting the Company or its business or any pending or threatened claims relating to environmental conditions at its properties or otherwise affecting the Company or its business. The Company has policies and procedures to review, monitor, and manage environmental exposure.

The Company plans to make the necessary capital and operating expenditures to facilitate compliance with environmental laws and other requirements. Although there can be no assurances, the Company does not believe that costs relating to environmental matters will have a material adverse effect on the Company's business, financial condition or results of operations. Moreover, environmental laws and other requirements can change and the Company may become subject to more stringent environmental laws and other requirements in the future, including those related to greenhouse gas emission reduction. Compliance with more stringent environmental laws and other requirements could have an adverse effect on the Company's business, financial condition or results of operation.

Catastrophic and general uninsured losses

A catastrophic loss includes the loss of or extreme damage to a property or portfolio of properties, loss of life, or disability that could have a material adverse effect on the Company's business, financial condition, prospects, results of operations or reputation. A significant injury, loss of life or damage to property could be a result of accidents incurred by employees, contractors or residents due to an unsafe work environment, unsafe properties, lack of appropriate safety precautions or natural disasters, beyond the control of the Company, such as fire, flood or earthquakes. The Company will continue to prevent and mitigate the impact of catastrophic loss of life or property by continuing to provide safe work sites for employees and contractors and providing safe living areas for residents by adhering to the Company's occupational health and safety standards. The Company mitigates the financial impact of potential losses by maintaining an adequate and cost-effective insurance program for the operation of the Company's business.

The Company carries General Liability and All Risks Property coverage including Business Interruption and Rental Income, with policy specifications, limits, and deductibles customarily carried for similar properties. There are, however, certain types of risks, generally of a catastrophic nature, such as wars or environmental contamination, which are either uninsurable or not insurable on an economically viable basis. The Company's insurance is subject to certain policy limits, deductibles, and self-insurance arrangements. The Company will continue to carry such insurance if it is economical to do so. Should an uninsured or underinsured loss occur, the Company could lose its investment in, and anticipated profits and cash flows from, one or more of its properties, but the Company would continue to be obliged to repay any recourse mortgage indebtedness on such properties.

Technology and information security

The Company is subject to technology and information security risk, including the risk that confidential information held by the Company is stolen or accessed causing financing or personal harm to the affected individual(s) or the Company's business. Additionally, cyber-attacks could cause disruption of operations or data corruption or result in remediation costs, additional regulatory scrutiny, litigation, and reputational damage. The Company is also subject to risks related to reliance on key personnel and catastrophic and general uninsured loss. The Company reduces this risk through enhancement of policies and procedures, and monitoring and auditing to ensure compliance related to information technology, safety of data, and secure storage of physical files.

A summary of the financial risks that arise from the Company's financial assets and liabilities are summarized under the "Financial Instruments and Risk Management" section in this MD&A.

Dividends paid per share	3.00	-

The variations in the financial data provided above are discussed in greater detail under "Discussion of Operations" in this MD&A.

Significant variations with respect to revenues are typically the result of the timing and quantity of residential and commercial unit sales closing at the development properties. The fluctuations in the total assets owned by the Company are predominantly the result of development activities undertaken by the Company. Total assets and non-current liabilities are also impacted by the acquisitions and dispositions of investment properties, which the Company manages and reviews on an ongoing basis to maximize value for shareholders. Dividends fluctuate as the Company has flexible dividend policy. The amount and timing of dividends will be based on the Company's availability of and need for cash flow.

OVERALL PERFORMANCE AND QUARTERLY INFORMATION

The Company operates in three different segments of the real estate industry: ownership and management of residential and commercial rental properties (referred to as investment properties), the development and sale of residential housing (referred to as development properties), and the ownership and management of hotel properties (referred to as property, plant and equipment).

The charts below show the Company's property holdings at April 30, 2023 and revenue derived from such segments for the three months ended April 30, 2023.

	\$ 3,463,309	\$ 35,977,472

Revenues from investment properties increased due to acquisitions of investment properties in the prior year, a decrease in vacancy rates, and increased rents on tenant turnover.

Revenues and earnings from property, plant and equipment (hotels) are higher than the prior year due to higher occupancy¹ and a higher average daily rate ("ADR")² at each of the Company's hotels.

Revenues and earnings from properties under development for sale were lower than the prior year due to the closing of 9 units at Ivy on the Park in the prior year.

DISCUSSION OF OPERATIONS

For the three months ended April 30, 2023, the Company earned revenues of \$32,204,872 (2022 - \$32,876,019) with a gross margin of \$13,584,196 (2022 - \$13,131,510).

Revenues and gross margins in the three months ended April 30, 2023 were higher than the prior period due to an increase in Investment property revenues and hotel revenues offset by a decrease in revenues from properties under development for sale.

¹ Occupancy (%) is calculated by dividing the total number of rooms occupied by the total number of rooms available.

² ADR is the average daily rate, which represents the average rental income per paid occupied room in a given time period. ADR is calculated by dividing the room revenue earned by the numbers of rooms sold.

General and administrative costs for the three months ended April 30, 2023 were \$759,040 (2022 - \$864,951).

Depreciation and amortization expense for the three months ended April 30, 2023 was \$3,313,857 (2022 – \$3,854,393). The decrease in the depreciation for the three months ended April 30, 2023 is due to assets that have been fully depreciated in the prior year.

Investment and other income for the three months April 30, 2023 was \$292,418 (2022 - \$32,446). Investment and other income are predominantly due to interest earned on surplus funds, and on interest earned on deposits held in trust in connection with condominium sales which accrue to the benefit of the Company.

Finance expense for the three months ended April 30, 2023 was \$6,340,408 (2022 - \$2,807,696). Finance expense for the three months ended April 30, 2023 includes interest expense of \$7,191,619 (2022 - \$4,206,316) less interest of \$851,211 (2022 - \$1,398,620) capitalized to the development projects. Finance expense for the current period is higher than the prior period due to higher interest rates and higher average level of outstanding debt.

Variations over the quarters are generally the result of the timing of residential and commercial unit closings at the development properties and seasonal and economic fluctuations characteristic of the tourism and hospitality industry in which the Company's hotels operate. Fluctuations in earnings for the quarters will also be impacted by the timing of sales and marketing expenses incurred at the Company's development projects, which are expensed as they are incurred.

Revenue and other income³ as well as net earnings for the quarters ended October 31 and July 31, 2022 was greater than the other quarters due to improved performance at the Company's hotels. Net earnings for the

³ Revenue and other income means gross revenue plus investment and other income. Revenue and other income can be calculated by taking revenue and adding investment and other income which is directly disclosed in the Company's Financial Statements. quarter ended April 30, 2022 were greater than the other quarters due to the sale of an investment property. Revenue and other income and earnings for the quarters ended July 31, 2021 were due mainly to the closing of 30 units at the Ivy on the Park project and 2 units at Eagle Mountain.

REVENUE-PRODUCING PROPERTIES

Residential and Commercial Rentals

As at April 30, 2023, the Company owned and managed 1,503 residential units and 20 commercial units in 17 properties in Metro Vancouver.

Combined revenues from the residential and commercial rental units were \$10,940,878 (2022 - \$9,526,806) for the three months ended April 30, 2023 with net earnings of \$2,020,000 (2022 - \$32,507,151). Net earnings for the three months ended April 30, 2022 included a gain on the sale of asset of \$30,340,556.

All residential units are leased primarily for a one-year term and all residential leasing arrangements are governed by the Residential Tenancy Act (British Columbia), which requires that fixed term residential tenancies automatically become month-to-month at the end of their term. Historically, rental rates may be increased to the maximum percentage equal to British Columbia's Consumer Price Index on tenant turnover or on the anniversary date of each tenant's date of occupancy. Effective January 1, 2023, the provincial government confirmed that for existing tenants, rent increases of no more than 2% may be issued.

Acquisitions and Dispositions

On March 30, 2023 and April 3, 2023, the Company purchased two residential strata units for \$1,379,000.

On May 23, 2023, the Company purchased a commercial strata unit for \$1,275,000.

Hotels

The Company owns and manages two hotel properties in Metro Vancouver: the Sheraton Vancouver Wall Centre Hotel ("Wall Centre Downtown") and The Westin Wall Centre Vancouver Airport ("Wall Centre Richmond").

The combined revenues for the hotel properties for the three months ended April 30, 2023 were \$20,859,515 (2022 - \$12,897,483). Earnings for the three months ended April 30, 2023 before income taxes from hotel operations were \$3,522,018 (2022 - \$2,485,572). The increase in revenues and earnings was due to higher occupancy and ADR compared to the prior period at both hotels.

The Wall Centre Downtown is the largest single hotel property in British Columbia with 746 guestrooms and 45,000 sq. ft. of meeting space. During the three months ended April 30, 2023, revenues were \$17,012,684 (2022 - \$10,098,295) with occupancy of 82.8% (2022 - 62.7%) and an ADR of \$209 (2022 - \$176).

Fair Value in Excess of Carrying Value

Management has estimated the fair value in excess of carrying value⁴ of its revenue-producing properties as at April 30, 2023 as follows:

As at April 30, 2023	Residential and Commercial Rentals	Hotels	Total
Fair Value	\$ 1,241,305,000	\$ 625,000,000	\$ 1,866,305,000
Carrying value	574,125,251	108,387,010	682,512,261
Fair value in excess of carrying value	\$ 667,179,749	\$ 516,612,990	\$ 1,183,792,739
Fair value in excess of carrying value per share			\$ 36.49

The fair values have been determined internally by management, in conjunction with independent real estate valuation experts using recognized valuation techniques.

DEVELOPMENT PROPERTIES

The asset value of properties under development for sale increased from \$151,395,224 as at January 31, 2023 to \$161,211,971 as at April 30, 2023 due to the purchase of 12 residential strata units and development costs incurred.

Earnings before taxes from properties under development for the three months and year ended April 30, 2023 were \$241,014 (2022 – \$1,935,416). Revenues and earnings in the current period were lower than the prior period due the sale of 9 units at Ivy on the Park in the prior period.

⁴ Fair value in excess of carrying value per share means fair value in excess of carrying value divided by the number of shares outstanding as at April 30, 2023 (32,438,765). Fair value in excess of carrying value per share does not contemplate transactions costs, tax liabilities, and other related costs if the properties were to be sold. Fair value in excess of carrying value is calculated by taking fair value internally determined by management and subtracting the carrying value of investment properties and property, plant, and equipment which is directly disclosed in the Company's Financial Statements. Management believes that this measure is useful for investors to evaluate the Company's financial condition.

CRITICAL ACCOUNTING ESTIMATES

The preparation of Financial Statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements, and the reported amounts of revenues and expenses during the reporting period. The Company's significant accounting estimates and judgements are described in note 2 to the Financial Statements, and the Company's significant accounting policies are described in note 3 to the Financial Statements.

SIGNIFICANT ACCOUNTING POLICIES

The Company's significant accounting policies and standards are described in note 3 of the Financial Statements.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

Disclosure controls and procedures within the Company have been designed to provide reasonable assurance that all relevant information is identified to senior management to ensure appropriate and timely decisions are made regarding public disclosure. The Company's management, including the President, the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO"), have designed internal controls over financial reporting (as defined in National Instrument 52-109 - Certification of Disclosure in Issuers' Annual and Interim

Filings) to provide reasonable assurance regarding the reliability of the Company's financial reporting and its preparation of financial statements for external purposes in accordance with IFRS.

Under the supervision of the President, the CEO and the CFO, the operating effectiveness of the disclosure controls and procedures and internal control over financial reporting were assessed using the criteria set forth by the Integrated Framework issued by the Committee of Sponsoring Organization of the Treadway Commission in Internal Control Over Financial Reporting. Based on these evaluations, the CEO and the CFO concluded that as at April 30, 2023:

- (i) Disclosure controls and procedures were effective to provide reasonable assurance that material information was made known to management and information required to be disclosed by the Company in its annual filings, interim filings and other reports filed by the Company under securities legislations was recorded, processed, summarized and reported within the periods specified in securities legislation.
- (ii) Internal controls over financial reporting were effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

For the three months ended April 30, 2023, there has been no change in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting. The Company's management will continue to periodically evaluate the Company's disclosure controls and procedures and internal control over financial reporting and will make any modifications from time to time as deemed necessary.

Based on their inherent limitations, disclosure controls and procedures and internal control over financial reporting may not prevent or detect misstatements, and even those controls determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

As at April 30, 2023, the Company's financial assets and liabilities consisted primarily of cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities, mortgages payable, deposits on real estate sales, and bank and other indebtedness. These financial instruments relate to the Company's normal course of business, with respect to the financing of its day-to-day operations, capital expenditures and acquisitions.

The carrying values of the Company's amounts receivable, deposits held in trust, notes receivable, due to related party, deposits on real estate sales, accounts payable and accrued liabilities generally approximate their fair values due to their short-term nature. The face value of bank and other indebtedness approximates its fair value, as it is due on demand. The fair value of mortgages payable is estimated by discounting the future contractual cash flows at the market interest rate that is available to the Company for similar financial instruments. The fair value of the mortgages payable as at April 30, 2023 was \$381,171,000 (January 31, 2023 - \$382,926,000).

The Company is exposed to interest rate and credit risks associated with its financial assets and liabilities. Management continually performs risk assessments to ensure that all significant risks related to the Company's operations have been reviewed and assessed to reflect changes in market conditions and the Company's operating activities. The Company does not enter into financial instrument arrangements for speculative purposes.

Interest Rate Risk

Certain debt on the Company's properties bears interest at floating rates. Fluctuations in interest rates will impact the cost of financing incurred in the future. The Company monitors its interest rate exposure on an ongoing basis.

Based on the debt outstanding as at April 30, 2023, management has determined that every 1% increase or decrease in the applicable interest rates results in a corresponding \$2,963,000 decrease or increase in the Company's annual earnings before income taxes.

Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligation. The maximum exposure to credit risk is the full carrying value of the financial instrument.

The Company is exposed to credit risk with respect to amounts receivable. This risk is mitigated by the Company's general policy to secure loan receivables with real estate property. For its hotel operations, the Company's credit policy is designed to ensure there is a standard credit practice throughout the Company to measure and monitor credit risk. The policy outlines delegation of authority, the due diligence process required to approve a new customer or counterparty and the maximum amount of credit exposure per single entity. The Company also regularly monitors credit risk and exposure to any single customer or counterparty.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the maintenance of sufficient available credit facilities to support the Company's ongoing operational and capital requirements.

A centralized treasury function ensures that the Company maintains funding flexibility by assessing future cash flow expectations and by maintaining sufficient headroom on its committed borrowing facilities.

The Company's bank and other indebtedness are repayable on demand, which creates a liquidity risk. The Company uses these loans to finance its development operations, and believes it could convert these loans into long term debt if desired. As at April 30, 2023, the Company was in compliance with its loan covenants, has made all required principal repayments, and has generated positive cash flow from operations, which are used to fund interest costs associated with the operating loans.

The following table summarizes the Company's contractual obligations including expected interest payments over the next five fiscal years:

As at April 30, 2023	Carrying amount	Total contractual cash flows	Less than one year	1-5 years	More than 5 years
Accounts payable and accrued liabilities	\$ 21,849,943	\$ 21,849,943	\$ 21,849,943	\$ -	\$ -
Bank and other indebtedness	240,251,881	240,251,881	240,251,881	-	-
Mortgages payable	401,352,707	431,397,289	74,755,848	212,110,293	144,531,148
	\$ 663,454,531	\$ 693,499,113	\$ 336,857,672	\$ 212,110,293	\$ 144,531,148

Based on the performance of the Company to date and the support from its lenders, the Company believes that the liquidity risk described above is manageable and has implemented strategies, including regular monitoring of debt covenants and cash flows in order to support this conclusion.

Over the current fiscal year, the Company's credit requirements consist of the following:

- Capital improvements to certain investment properties which will be funded primarily from operating cash flow.
- Construction financing for properties under development. It is management's policy to not proceed with significant new construction or land purchases if financing commitments are not in place.

OFF-BALANCE SHEET FINANCING

In the normal course of development operations, the Company is required to issue letters of credit to various municipalities (or other beneficiaries) in which its developments are being conducted. These letters of credit are to secure the Company's obligations pursuant to development agreements signed with the beneficiaries and include a wide range of works and services, such as those related to off-site civil works, street lighting, on-site and off-site landscaping, public art, energy standards, and various public amenities. The beneficiaries have the right to call on the letters of credit if the Company defaults on its obligations, which obligates the Company to pay money to the beneficiaries based on terms outlined in the letters of credit.

Under IFRS, these letters of credit are disclosed as commitments of the Company and only recorded on the Consolidated Statements of Financial Position if they are drawn upon. As at April 30, 2023, the Company has total outstanding letters of credit of \$16,539,225 (January 31, 2023 - \$16,557,225).

The amendments do not directly or indirectly increase the Company's liabilities, obligations or costs. Non-controlling interest as at April 30, 2023 includes \$1,703,018 (January 31, 2023 - \$1,708,423) relating to these agreements with the Wall Equity Companies.

All other agreements entered into with any related party will be based on a profit share in proportion to their capital investment in the respective projects.

As discussed under "Development Properties" in this MD&A, a wholly owned company of Mr. Bruno Wall holds a 25% interest in the Ivy on the Park project on leased land at the University of British Columbia. As at January 31, 2023, this interest represents \$76,956 (January 31, 2023 - \$3,647,008).

In February 2016, the Company leased premises at the Wall Centre Downtown (the "Premise") to 1062682 BC Ltd. (the "Tenant"), a wholly owned company of Mr. Peter Wall, for a term of 10 years commencing on April 1, 2016. Under this agreement, the Tenant pays a base rent of \$14,286 per month. The Tenant is responsible for its operating costs, while the Company is responsible for property taxes and utilities in respect of the Premise.

These transactions are in the normal course of business and are measured at the exchange amount of consideration established and agreed to by the related parties. In management's opinion, the exchange amount approximates fair market value.

CAPITAL MANAGEMENT

The Company's primary objective when managing capital is to provide financial capacity and flexibility to meet its strategic objectives.

The Company's liquidity needs are for development costs, potential property acquisitions, scheduled debt maturities and non-recurring capital expenditures. The Company's strategy is to meet these needs with one or more of the following: cash flow from operations; credit facilities and refinancing opportunities.

The following schedule details the components of the Company's capital:

	April 30, 2023	January 31, 2023
Liabilities:		
Bank and other indebtedness	\$ 240,251,881	\$ 143,842,953
Mortgages payable	393,808,216	396,106,941

Non-controlling interest	49,348,901	52,149,452
Total capital	\$ 707,508,399	\$ 616,198,747

As at April 30, 2023, the Company was in compliance with its loan covenants, has made all required principal repayments, and has generated positive cash flow from its combined rental and hotel operations, which are used to fund interest cost associated with the operating loans.

OUTLOOK FOR OPERATING CONDITIONS

Hotel Operations

We recorded solid and continued growth in both revenues and gross operating profits at both hotel properties in the first quarter. Current booking trends indicate that the Company should achieve its best ever room revenues this fiscal year due primarily to higher room rates. Catering and banquet revenues are lagging forecasts somewhat and operating costs continue to increase, especially for hourly associates and for fixed expenses such as property taxes, utilities, and insurance.

Rental Apartments

The Company is continuing with its strategy of expanding the portfolio of rental properties; we have submitted our Development Permit application for the 217 unit, 32 storey tower at 1290 Hornby Street in Vancouver's

downtown south and anticipate a public hearing in the third quarter to review and hopefully approve our application for a 179 unit tower at 1065 Pacific Street in Vancouver's West End Neighbourhood.

Vacancy rates remain low across the portfolio and rents are increasing significantly on tenant turnover. Effective 2023, rental rates for existing tenants are permitted to increase by a maximum of 2.0% annually. Operating costs, especially for insurance, utilities, and property taxes continue to increase at rates in excess of 2.0%.

Development Properties

Trails 1B, consisting of 48 units, is now under construction with completion expected by March 2024, of which the Company owns a 42.86 % interest. The Company is proceeding without pre-sales and will market the units once complete.
