Carmen Rizzo, producer of Seal, Coldplay, Alanis Morissette said:

In the heart of silence something amazing is born. The band InSideOut penetrates our souls with their debut album “Incognito”. They’re new, they’re fresh, but most importantly they’re experienced musicians becoming music makers. Their music is like the mystery of evolution. Each note is like a key that unlocks a new world of musical expression.

Yes, their songs on “Incognito” sound very familiar, they are original remakes of old hits that draw us into a world where music creates and shapes new ideas. Each lyric tells a story, and each chord is like a movement that carries you along.

InSideOut finds its way to create music that speaks to our hearts and minds.

Get ready for an adventure and be swept away into the mysterious world of InSideOut and their original remakes of old hits on “Incognito”.

Are you ready for this musical journey?
