Mission-critical systems, *designed for the people who use them.*

WANDR is a remote UX, product design and development studio headquartered in Los Angeles. Since 2019 we have partnered with the U.S. Air Force, U.S. Space Force, AFIMSC and local government to modernize digital experiences, deploy Microsoft 365 solutions and build human-centered systems that actually work for the people using them.

500+	2019	Phase III+	GSA
projects delivered across government and commercial	serving government customers since	SBIR progression with an ongoing Air Force engagement	Approved

CORE COMPETENCIES

01 UX & Human-Centered Design

- UX research & discovery within your operational context
- Journey mapping, information architecture, rapid prototyping
- Usability testing before development; UI & design systems
- Section 508 / WCAG accessibility built in from the first wireframe

02 Microsoft 365 & Power Platform — NEW

We deploy the Microsoft 365 capabilities agencies already pay for, pairing technical depth with human-centered design.

- SharePoint development, intranets & migration
- Power Apps (canvas & model-driven) and Dataverse
- Power Automate workflow automation & RPA
- Microsoft Teams administration & governance
- Azure AD / Entra ID engineering; M365 security & compliance

03 AI Product Design & Integration — NEW

- AI product strategy: define the job the AI should do and where a wrong answer costs most
- Trust-focused UX for probabilistic, multi-turn and agentic workflows: confidence signals, easy correction, graceful failure, human-in-the-loop
- Prototype-to-production hardening; instrumenting adoption, trust and retention

Proof: Designed and built the front end of Valkyrie's live generative-AI portrait experience at SXSW (with Porsche and Soho House), supported live through the run of show.

04 Development & Engineering — NEW

- Front-end and back-end engineers, project-based or embedded in your team
- MVP development, web apps, API integrations
- JavaScript / TypeScript · React · Next.js · Vue.js · Angular · Node.js · NestJS · Express · PostgreSQL · MySQL · MongoDB

Proof: Research, UX/UI and a Vue.js front end for Appevate's rewards API platform.

PAST PERFORMANCE

U.S. Air Force · AFIMSC Strategy Hub

2019 to present · SBIR Phase I FA8649-19-P-A317 → Phase II FA8649-20-C-0099 → Phase III 47QFRA21C0005

Designed and built a unified platform for strategic planning, execution and reporting, replacing disconnected spreadsheets and manual processes. Scope covers enterprise-wide onboarding of directorates and subordinate units, data integration, dashboards and visualization, and automation. Rapid prototypes were validated with Air Force stakeholders before development, and the engagement has continued beyond Phase III.

U.S. Space Force · AFIMSC · Local government agencies

Federal & municipal · UX design & digital services

Human-centered digital experiences for agencies where clarity is mission-critical, delivered with security sensitivity, accessibility compliance and stakeholder alignment across complex chains of command.

Valkyrie Intelligence · AI

SXSW live generative-AI activation

Front-end design and build, from guest interaction to the gallery display of AI-generated images; deployed on a compressed schedule and supported live.

Vectrix · Cybersecurity SaaS

Acquired by Cloudflare

Product strategy, end-to-end UX and a design system for the product Cloudflare acquired.

Cinépolis · Entertainment

+25% online ticket sales

Rebuilt the ticket-purchase flow end-to-end, then scaled the work into a global design system across five markets.

Sticky.io · B2B SaaS

95% satisfaction on redesigned prototype

Set up design operations, built a design system from scratch and redesigned merchant and admin interfaces in 3 months.

DIFFERENTIATORS

Women-owned. Minority-owned.
Women-owned (WOSB certified) and minority-owned small business, registered in SAM, supporting small-business and set-aside goals.

Design + Microsoft in one team
UX research and Microsoft 365 / Power Platform delivery from the same team, so systems get adopted, not abandoned after go-live.

We stay beyond the contract
Our Air Force SBIR work grew from Phase I to Phase III and an ongoing engagement.

Fast to start
Scoping typically begins within 48 hours; remote team across LA, Austin, Miami, Silicon Valley and Mexico City.

HOW WE WORK

01
Discover & Align
Mission goals, user needs, success metrics and security requirements agreed before design or development begins.

02
Research & Validate
User research inside your operational context: real workflows, pain points and mental models.

03
Design & Build
UX design and rapid prototyping through Microsoft 365 deployment and Power Platform development, within your compliance environment.

04
Deploy & Iterate
Launch, adoption and continuous improvement, embedded with your team through delivery and beyond.

Let's talk about *your mission.*
