

The specialist for industrial buildings.

FACTSHEET

BUILD YOUR SUCCESS WITH US.

WE ARE YOUR SPECIALIST
FOR INDUSTRIAL BUILDINGS.

Since 1966, IE has been planning, designing, and implementing advanced and sustainable industrial buildings that are tailored by our industry experts to individual production requirements. Anyone who wants to remain competitive in the long term, needs flexible industrial buildings, ideal production sites, and automated manufacturing processes.

TEAMWORK WITH EXPERTISE.

With the experts at IE Group, you have innovative initiators and active co-creators at your side who know all the requirements of your industry down to the last detail. They work together in interdisciplinary and cross-functional teams to pool their expertise in the fields Food, Plast, Life Science and Technology and optimize the network between each other.

ENTREPRENEURIAL THINKING AND ACTION.

All IE Group employees have a share in the company. This means you benefit from a unique motivation and initiative of our teams. Always in focus: the greatest possible efficiency for your production. In addition, we also provide you with guarantees on costs, deadlines, and quality - no matter how large your construction project is.

EMPLOYEES

- › Construction and production planners, architects, industrial and mechanical engineers, logistics and building services experts

ORIGIN

- › Founded in Switzerland in 1966, now based in the DACH region

LOCATIONS

- › Offices in Zurich and Munich

TURNOVER

- › CHF 80 million | EUR 67 million

FUTURE-PROOF SOLUTIONS

- › Development of state-of-the-art industrial buildings and fully automated production processes

CUSTOMIZED

- › Design and realization of flexibly adaptable production sites

INTERDISCIPLINARY TEAMS

- › Bundled planning expertise from experienced industry and technical experts

INTELLIGENT PROJECT PLANNING

- › Industrial construction projects consistently planned from the inside out

FLEXIBILITY FOR PROCESS-OPTIMIZED INDUSTRIAL CONSTRUCTION.

Our experts work with you to develop and implement comprehensive strategies and future-proof concepts for innovative industrial buildings. They rely on the proven IE-Methodology and the IE-Master plan. This ensures that your manufacturing processes, material flows, and personnel flows are perfectly coordinated and you benefit from a unique competitive advantage.

IE-METHODOLOGY – Individual project planning from the inside out.

- Optimal integration of operational and construction planning for **permanently reduced operating costs**
- Forward planning for **maximum flexibility and efficiency**
- **Full control** through four clearly defined phases, each with its own contracts
- Contractual guarantees and **100% cost assurance**

IE-MASTER PLAN – Innovative Management-Tool for future-oriented construction projects.

- **Strategic roadmap** for future change and growth scenarios
- Innovative solutions with **maximized planning and investment security**
- Future-proof and **comprehensive concepts** for your construction project
- **Joint determination** of medium- and long-term target requirements

OUR RANGE OF SERVICES FOR YOUR SUCCESS.

DEVELOPMENT

- Goal-setting workshops
- Investment strategies
- Feasibility studies
- Site structure plan
- IE-Master plan

PRODUCTION TECHNOLOGY

- Requirement profiles
- Tenders
- Technical comparisons
- Draft contract
- Specifications
- Commissioning

OPERATIONS PLANNING

- Requirements planning
- Operating concepts
- Process planning
- Hygiene concepts
- Logistics concepts
- Digitalization and automation concepts

CONSTRUCTION PLANNING

- New construction of industrial buildings
- Conversion of existing buildings
- Extensions for production halls, administrative buildings, and warehouses
- Clean room construction
- Factory construction

EXECUTION

- General contract
- Construction management
- Supervision
- Coordination of operations, building services, and building technology
- Guarantees for costs, deadlines, function, and quality
- Documentation

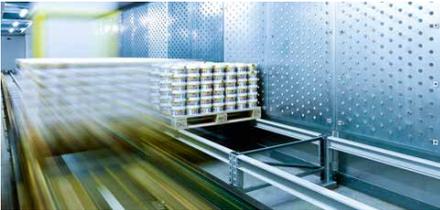

LOGISTICS

HYGIENE AND CLEANROOM

DIGITALISATION AND AUTOMATION

OUR SPECIALIZED COMPETENCIES FOR YOUR INDIVIDUAL REQUIREMENTS.

In order to find the best solution for all requirements, we involve experienced specialists and engineers from the fields of logistics, hygiene, and cleanrooms at every stage. For process optimization, we also call on experts who are well acquainted with the digitalization and automation of your operations.

LOGISTICS – Efficiency provides the decisive competitive advantage.

The true potential for efficiency in your own logistics processes often lies in perfectly coordinated material and personnel flows. A holistic approach and interdisciplinary networking are absolutely essential for process optimization.

HYGIENE & CLEANROOM – Always economical, without fail.

Our experts work with you to develop comprehensive solutions that go far beyond personnel and material flow, enabling you to control particulate and microbiological contamination, among other things.

DIGITALISATION & AUTOMATION – Respond flexibly. Completely automatically.

Sustainable production and logistics processes are important components of holistic planning. This includes analyzing existing processes as well as utilizing innovative technologies, automation solutions, and digital workflow concepts.

DIESE KUNDEN BAUEN AUF UNS.

WHAT DEFINES US:

AT HOME IN YOUR INDUSTRY

- Specialized in seven industries
- Understanding of production processes and individual requirements
- Holistic operational, logistics, and industrial construction solutions consistently planned from the inside out

ENTREPRENEURIAL THINKING AND ACTION

- 100% in the hands of the employees
- High motivation and initiative
- Cooperative partnership

ALL EXPERTS UNDER ONE ROOF

- Team of industry engineers, architects, specialist planners, and logistics experts
- Production processes, technical building equipment, and architecture optimally coordination
- A single point of contact

SECURITY THROUGH GUARANTEES

- Planning and execution from a single source
- Guarantees for costs, deadlines, quality, and functionality
- Security also in the form of a contract for work and services

CONTACTS US – WE ARE HAPPY TO CONSULT YOU.
