

Company facts & copy

In a sentence

Gather is a construction Record Management System (RMS) that helps teams capture daily activity, resources, progress and supporting evidence, then use those records in project reporting and commercial review.

About Gather

Gather is a construction Record Management System (RMS) built around the practical needs of site and commercial teams. It connects daily activity, labour and plant, progress, events and photographs in a structured project record. Teams use that evidence for reporting, progress review and the substantiation of change. Its QS AI Agent helps review records and flag matters for the project team to examine. Founded by chartered quantity surveyor Will Doyle as Raildiary in 2016, the business adopted the Gather name in 2024 as its work extended beyond rail. Gather is based in Manchester, United Kingdom.

Founder & brand resources

Will Doyle

Founder and CEO | Chartered quantity surveyor

Will Doyle is the founder and CEO of Gather and a chartered quantity surveyor. He founded Raildiary in 2016 after experiencing how difficult it was to retrieve reliable site evidence for commercial work. The business became Gather in 2024 as its work expanded beyond rail. Will speaks on construction records, commercial management and the practical use of AI in quantity surveying.

Available for commentary on

Construction site records and commercial evidence
AI in quantity surveying and commercial management
NEC contracts, change and compensation-event evidence
Building construction technology from practical experience

Logo files

Four variants: full colour for light backgrounds; full colour for dark backgrounds; black; white. Each is supplied in SVG and transparent PNG. SVG is the preferred format for print and scalable artwork.

Editorial use & credits

Use the supplied logos, founder photograph and product screenshots for editorial coverage of Gather. Credit images: Gather. Keep logos in their supplied proportions and colours; do not stretch, redraw, add effects or combine them with other marks. Allow clear space around the logo and use a contrasting background. Use SVG for scalable artwork and PNG for transparent raster artwork. For advertising, endorsements, additional photography, print-resolution imagery or other uses, contact will@gatherinsights.com. Product screenshots illustrate the interface and must not be presented as audited project results.
