

The Company

Tamarack Valley Energy Ltd. is a corporation engaged in the exploration, development, production and sale of oil and natural gas in the Western Canadian Sedimentary Basin. Tamarack is a pure-play Clearwater producer, holding an extensive inventory of primary drilling and waterflood expansion opportunities at Nipisi, Marten Hills and South Clearwater in Northern Alberta. Tamarack also manages an enhanced oil recovery portfolio of diverse assets across Alberta. The Company is committed to creating long-term value for its shareholders through sustainable free funds flow generation, financial stability and return of capital. The Company is publicly traded on the Toronto Stock Exchange under the symbol "TVE". For more information, visit www.tamarackvalley.ca

Role Description

Tamarack Valley Energy Ltd. is seeking a Development Engineer to join its Clearwater team. The Clearwater is one of the most active plays in North America, where multilateral wells and waterflood deliver industry-leading economics. The successful candidate will collaborate with a multi-disciplinary asset team to build, maintain and optimize Tamarack's long-term development plan.

Summary of Duties:

- Collaborate with a multi-disciplinary team including geology, production, operations and land to build and optimize the long-term plan for designated asset area
- Prepare and present budget and project proposals including technical analysis, type-curve generation, economics, and strategic rationale
- Complete monthly capital and production forecasts and provide periodic asset performance updates to management
- Steward year-end reserves process with independent qualified reserves evaluator
- Track industry activity and propose acquisition and divestiture opportunities within area of responsibility
- Monitor and optimize active waterfloods within area of responsibility
- Prepare technical analysis and documentation for regulatory applications

Qualifications and Education Requirements:

- P.Eng. registered with APEGA
- 5 to 15 years of industry experience across development, reservoir and/or operations engineering
- Experience with waterflood surveillance, development planning, project justification, economics and reserves evaluation
- Highly collaborative approach with the ability to influence across disciplines
- Track record of developing innovative ideas that improved results
- Clear, concise communicator, comfortable presenting recommendations to senior leadership
- Experience with GeoScout, ValNav, OFM, Power BI and AI tools is an asset
- Heavy oil experience is an asset
