CREPE MYRTLES

January is typically when we trim crepe myrtles. If you are signed up for the shrub trim package and we know you have crepe myrtles, we will automatically come out to trim these. Please refer to the picture and let us know if you would like them trimmed a specific way. If we do not hear from you with a preferred style, we will “thin” them. If you are not sure if you have crepe myrtles on your package or you do not have a package with us, call or email us today to make sure we get you done this month.

PAMPAS GRASS

January is also the time of the year when we trim pampas grass. This also is part of the shrub trim package. It's important to do regular trimmings to maintain a neat appearance and keep the plant from not overgrowing and invading other plant's spaces. If you are unsure if you have pampas grass on your package, please call or email us to confirm. If you are a customer who has pampas grass and do not have a shrub trim package with us and would like us to trim your pampas grass, call for an estimate or to get added to our list today.

LAWN APPLICATIONS

Have you been wondering how you can get your yard to look it's very best? Have you been envious of yards in the neighborhood? Do you have a lawn application package? If you do not have one, you should consider starting the new year off right by getting one. If you do have one, do you have our premium monthly lawn application package? This is our most comprehensive package which includes insecticide and fungicide preventatives. These save you tons of money by preventing possible costly issues before they arise. It also allows one of our technicians to be on site once a month and treat anything they need to on the spot.
