## Are you in need of sod?

Cold and wet weather conditions wreak havoc on southern turf. Call or email today for a quote on resodding your lawn. The best time to beat the busy season rush is to have it done in March. This also will help reduce your water bill versus having it replaced during the hot summer months when you have to drastically increase water run times.

## Let 2026 be the year of your outdoor space transformation

Shrub  
App #2

## Pre-emergent and dogs

Lawn app #1 contained a winter pre-emergent. Please note that if you have dogs, you may still see weeds. The reason for this is that the animal's urine may disturb our pre-emergent and allow weeds to grow in those areas.

### TURF QUALITY

If you have any concerns about the quality of your turf throughout the winter months, please email in pictures to [info@amazingbladeslandscaping.com](mailto:info@amazingbladeslandscaping.com). A manager can review them and make recommendations.

## Fall in Love

February is the month of love. Why not show your landscape beds some love by giving them a little makeover? Some new mulch, rock, pine straw and plants can really go a long way. Don't just fall in love with your significant other, fall in love with your outdoor space too. Get on the list now to create an outdoor space that you and your love can enjoy all throughout the 2026 year! Let us do the work for you so can reap the benefits and have more time to spend together.

"Sometimes the key to a happy marriage is hiring someone else to do the manual work for you."- A happy wife

### LAWN APP #2

This month we will be applying lawn app #2, for all of our lawn app customers. Lawn app #2 is Top Choice. Top Choice is an insecticide that treats for mole crickets and fire ants. This is the only lawn app that you are able to opt out of. With that said, if you previously opted out of it, it will be skipped again this year. Please make sure you have it in your package if you wish to have us apply it.

### SHRUB APP #1

This month we will be applying shrub app #1 for all customers who have our shrub app package. This application is horticultural oil for control of mites, aphids, scale and caterpillar eggs.
