January Edition

HAPPY NEW YEAR!!

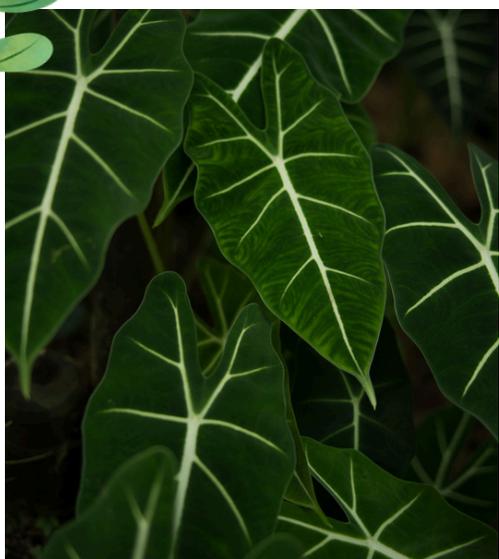

HIGHLIGHTS

- Crepe Myrtles
- Pampas Grass
- Lawn Applications

Let us know how you would like your Crepe Myrtle trimmed.

Now is the time to trim your Crepe Myrtles. Late winter is the best time to trim Crepe Myrtles because they are leafless and the branches are easily seen. They may bloom better if trimmed.

Did you know that there are 3 different trimming styles you can chose from when it comes to trimming your Crepe Myrtles? Please see the picture above and let our office know which method you would prefer!

- Trim Styles**
- Thinned
 - Topped
 - Murdered

Out with the old, in with the new.

Now is the perfect time to have your Pampas Grass cut back, just before the plant begins sending up new foliage. It's important to do regular trimmings, not only to maintain the neat appearance but to keep the plant from not overgrowing and invading other plants space, as well as allowing to promote new growth.

Lawn Application Packages

We offer different Lawn Application Packages for every budget and need. If you are looking to upgrade or take your yard to the next level this year, consider our Premium Monthly Lawn Application Program. This package allows our tech to be on site every month to ensure your lawn is getting all of the care it needs at a fixed rate. We have added Army worm and Fungicide applications so they will be applied as preventatives at the proper time. We are adding Diamond grow, a humic acid that aids in the effectiveness of our fertilization program and encourages healthy soil.

Employee of the Month

Meet Zeus

Cheers to our sweet, rambunctious Zeus. Zeus is a 1-year-old Bernese Mountain dog. He loves riding in the truck with his dad and brother visiting homeowners. When he is not getting treats, napping or playing with his brother, he is walking the neighborhood, visiting our office neighbors. As you can see, he loves walking on the beach and posing for pictures. He will be adding sled pulling to his hobbies soon. We love you Zeus!
