

AMAZING BLADES LANDSCAPING

HAVE YOU REQUESTED YOUR MULCH, PINE STRAW OR ROCK YET?

Have you called or emailed to request your mulch, pine straw or rock install yet? We are in our last final weeks before our BUSY season kicks off and our waitlist extends out up to 12 weeks out. Make sure to get added to the waitlist now to ensure you get your beds refreshed early.

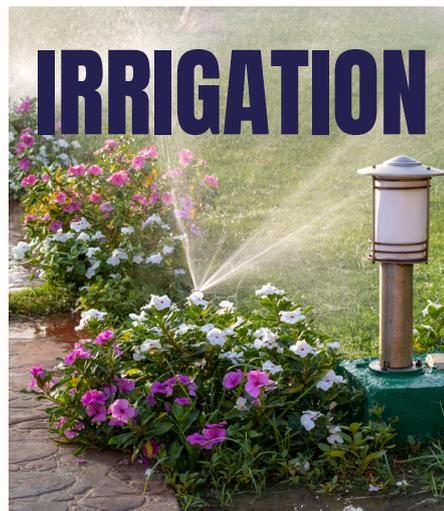

Are you looking for something different that really provides that "WOW" factor and pop? Consider mixing and matching mulch and rock. These two combinations really can elevate your landscape beds to the next level, providing a multi-dimensional look and various color. Make it even more elegant by adding some new plants in to give it even more color. This is guaranteed to get you "yard of the month" in 2026. Be prepared to be the talk of the neighborhood, for all the right reasons!

FINAL WEEKS FOR A CLEAN UP

If you have not had winter services with us and your property needs to be cleaned up in order for us to maintain this season, your first mowing in April will be charged at an hourly rate. This is so we can get it ready and in the proper condition for us to maintain it all season long. If you do not have winter services with us, you can schedule a clean-up prior to the beginning of our mowing season. Our mowing season begins the beginning of April.

Do you have one of our irrigation packages? We will begin our spring start-ups this month, when the weather warms up and stays consistently warm. Remember, we go down our list of irrigation package customers and get to as many as we can each day. We do not have a schedule for this and are unable to let you know what date we will be out to start yours up. Please be patient as we make our way around to these customers.

If you are not an irrigation customer and would like us to inspect and start your system up this spring, call today to get added to the waitlist for this. Make sure you are starting the season off right with a properly working irrigation system. Ensuring the system is in good working condition can prevent costly repairs and possible turf replacement.

POA ANNUA

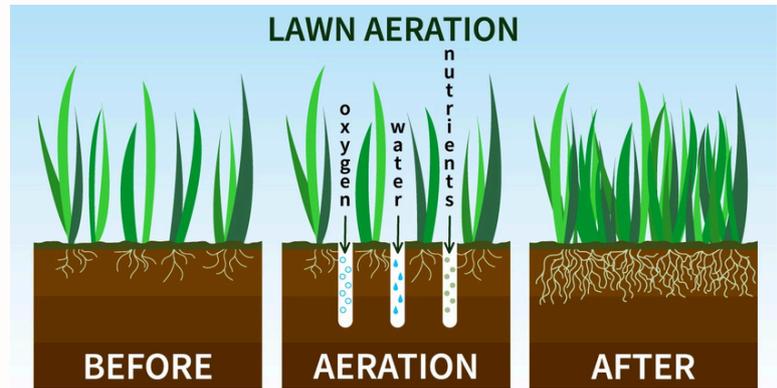

It is quite possible that you will begin seeing this weed start popping up in your yards over the next few weeks. This is a weed called poa annua. We do not treat for this weed; however, you are not stuck with it. This particular weed will start dying off as the weather warms up.

AERATION

We have been getting a lot of calls for aeration services. We are happy to announce that YES, we will be doing this service again this year, however, it is best to wait until the turf is out of dormancy. The turf typically transitions out of dormancy in May.

Lawn aeration is the process of punching holes in your lawn's surface, reducing surface compaction and allowing air to permeate the ground. Over time, grass and soil can become compressed and compacted, creating thatch. Thatch is a thin layer of dead and living grass roots, stems and shoots that form between the soil and grass in the lawn. These holes also create a path for water and fertilizer to easily reach the root zone beneath the turf, helping ensure a thick lawn and reducing thatch..

LIGHT IT UP

Is your property dark and uninviting? Have you ever thought about adding some landscape lighting to the beds, highlighting a specific feature, or brightening up the front door for security reasons? Did you know that we have a landscape lighting demo, where we can come and temporarily install lighting to show you how it would look on your property?

Landscape lighting provides many benefits. Not only does it look beautiful and add value and curb appeal to your property, however, it can also provide an extra layer of protection to deter both falls and burglars. A lighted up pathway allows a better visual path and can prevent unnecessary falls and injuries. It also can deter unwanted animals from entering the yard as well as uninvited and unwanted people from entering the inside of the home.

If you recently installed a new pool, don't forget to accessorize it with lighting.

Call us today to get your free landscape lighting demo and see what a difference lighting can make in your own personal space.
