

AMAZING BLADES LANDSCAPING MONTHLY NEWSLETTER

May 2026

We want to start off by thanking you for your patience and understanding throughout our first month of the season. Our crews had a lot of clean ups to do on customer's properties who have not been serviced all winter long, which took them longer to get through. We understand that it is frustrating while you wait for us to get to you and truly appreciate your patience. Now that the first month is down, we should be back onto our normal schedule.

DROUGHT STRESS

Given the lack of rainfall we have been experiencing, we are seeing a lot of drought stress. Drought stress will appear as brown almost dead looking areas in your yard. All it needs is water to recover, but a lot of it. If you have drought stress, start watering those areas twice a day until it recovers. You should notice a big difference after a week or so of doing this. Extra irrigation run times are extremely important in times where we are in a drought.

REFER A FRIEND

Let us reward you! If you are a current customer with recurring services and refer a new customer who signs up for recurring services with us, you both receive a \$50 referral credit after their first 60 days of service. Make sure they mention your name when they call in for an estimate!

Amazing Blades Landscaping

This month we will begin the following services:

Lawn App #4

Post-emergent weed application with liquid iron. This will help to get rid of weeds and green up your yard.

Premium Monthly Lawn App

Broadleaf weed control, liquid iron, Diamond grow and growth regulator.

Shrub Trimming

Shrub trimming is about to begin. Our waitlist is 6-8 weeks out, if you are in need of shrub trimming and do not have the shrub trim package with us, call today to get on it or for a 1 time trim.

Aeration

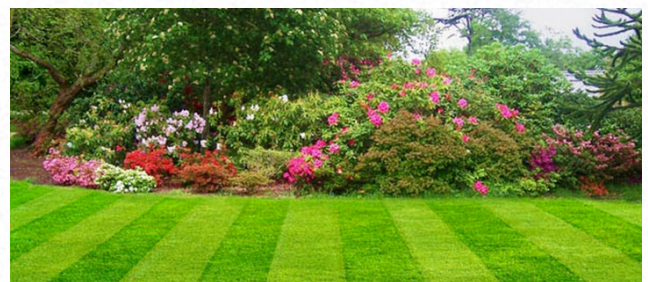

We will begin aeration shortly. Aeration is good for ALL turf types. It especially helps areas with heavy shade or lots of trees. Aeration helps with soil compaction. If you want to get on our list for aeration this month, call or email today for an estimate.

Irrigation

Temperatures are expected to soar this summer. Are you prepared to keep your yard hydrated all summer? Sign up today for one of our irrigation packages so we can make sure your system is properly functioning and your turf is getting adequate coverage. Upgrade to a smart irrigation system and allow us to monitor your system monthly to ensure your turf and landscaping are properly watered all throughout the year. This is perfect for out-of-towners or if this is your vacation home.

Planting

When planting, please remember to plant things inside of beds with mulch around it. Nothing should ever be planted standing alone in the middle of the grassy turf. Our crews can mistake these for weeds and weed whack them down or mow them over. Plantings should always have a clearly defined home.
