CAPABILITY STATEMENT

OUR VALUES

Integrity

Honouring our commitments is key to upholding trust through ethical practices and transparent conduct.

Family

Fostering a supportive and inclusive environment where everyone feels valued and connected.

Stretch Targets

Embracing ambitious goals that push boundaries and inspire exceptional performance.

Innovation

Cultivating a culture of creativity and forward-thinking to drive continuous improvement and breakthrough solutions.

Safety

Prioritising the well-being of our employees, customers and communities by maintaining the highest standards of safety in all our operations.

OUR VISION IS TO BE THE CRUSHING AND SCREENING CONTRACTOR OF CHOICE

At Crushing Services Australia, we provide tailored crushing and screening solutions for mining and civil projects, with a focus on safety, innovation, and efficiency.

To support continued growth, we have developed a state-of-the-art facility in Forrestdale, Western Australia. This purpose-built hub integrates engineering, logistics, and maintenance under one roof—reducing third-party reliance and enhancing operational efficiency. From planning to execution and maintenance, CSA offers end-to-end services, ensuring seamless coordination, consistent quality, and on-time delivery.

OUR COMMITMENT TO EXCELLENCE

CSA operates under International ISO Standards, ensuring best practice of safety, quality and environmental management.

CRUSHING & SCREENING

Powered by state-of-the-art equipment and skilled operators, CSA delivers precision material reduction across ores, aggregates, and SCATs. Whether it's a large-scale mine or a bespoke civil project, our solutions are custom-tailored to maximise efficiency and results.

By upholding the highest standards of safety, performance, and environmental compliance, we ensure every project runs smoothly—driven by integrity, innovation, and a strong, family-oriented culture that underpins everything we do.

SUSTAINABILITY IN ACTION

CSA is committed to sustainability, implementing advanced dust suppression systems, energy-efficient machinery, and waste reduction strategies to minimise environmental impact. Our proactive approach ensures compliance with stringent environmental regulations while reducing our carbon footprint across all operations.

HOW WE DELIVER

At CSA, we set a standard that clients truly appreciate by making the mobilisation process smooth and efficient.

Our approach includes our transport division—CSA Haulage, a fleet of new and well-maintained crushing and screening plant, and a skilled workforce equipped with extensive expertise. We ensure that all aspects of a project are seamlessly coordinated, enabling us to mobilise quickly and effectively at short notice.

CULTURE & HERITAGE

CSA often operates in culturally significant regions of Western Australia and the Northern Territory, including Groote Eylandt, Barrow Island, and Murujuga National Park. We prioritise cultural awareness and respect, with a strong commitment to preserving the unique landscapes, rock art, wildlife, and flora of these areas.

OUR PEOPLE

At CSA, we invest in our people through training, apprenticeships, and ongoing skill development—empowering them to grow, strengthening our performance, and ensuring the highest level of service to our clients. Our team is at the heart of everything we do, and we take pride in creating a work environment where every member feels valued, empowered, and supported in their professional growth.

COMMUNITY & SPONSORS

At CSA, we believe sport promotes not only physical well-being but also essential life skills such as leadership, teamwork, and discipline.

We're proud to support the Western Australian Women's Gaelic Football team in the Australasian State Games, the Western Australian Sporting Car Club, and the Subiaco Football Club.

OUR PROJECTS

CROSS-ISLAND TRENCHING PROJECT

Operating within one of Australia's most environmentally sensitive zones, CSA is supporting the Barrow Island Cross-Island Trenching project with specialised crushing and screening services. The project is a complex operation carried out within a highly regulated Class-A nature reserve which requires strict bio-security compliance, with stringent quarantine controls to protect the island's fragile ecosystem. CSA deployed specialised equipment and tailored operational procedures to meet these

environmental requirements while maintaining high productivity. Since October 2023, CSA has kept a record of zero injuries, highlighting our strong safety culture. With the project on track for completion in 2025, our commitment to exceeding the highest environmental and safety standards reinforces our reputation as a reliable partner, driven by integrity, innovation, and a focus on achieving the best possible outcomes for our clients and the communities we serve.

BARROW ISLAND, WA

CLASS-A NATURE RESERVE

PERDAMAN CERES UREA PLANT PROJECT

CSA continues to deliver crushing and screening services for the Perdaman Ceres Urea Plant project—a significant development supporting Australia's fertiliser industry. The project involves two high-capacity crushing plants supplying critical construction materials. Located near significant Aboriginal rock art, the site demanded strict environmental and heritage protection. Being awarded this work reflects CSA's strong commitment

to cultural and environmental responsibility. A custom dust suppression system was implemented to minimise environmental impact while maintaining a consistent 5,000 tonne daily throughput. With over 100,000 man-hours and zero injuries under our Life-Saving Rules framework, CSA is on track to exceed 2.5 million tonnes and complete the project safely, on time, and to the highest standard.

KARRATHA, WA

2.5 M TONNES

BLUE HILLS OPERATION PROJECT

CSA is a key partner in KMG's Blue Hills operation, providing crushing and screening services for high-grade direct shipping ore (DSO). Since commencing operations, CSA has processed over 3 million tonnes of DSO, consistently achieving a daily throughput of 4,500 tonnes. Given the tight shipping schedules and high demand for precision in material

handling, CSA implemented a rigorous maintenance program. This program ensures maximum plant uptime and reliability. With over 40,000 man-hours worked and zero injuries recorded, CSA has maintained a strong safety culture while playing a crucial role in supporting KMG's production goals for 2025 and beyond.

BLUE HILLS, WA

2.2 M TONNES

WOODSIDE PLUTO TRAIN 2 PROJECT

CSA provided crushing and screening services for the expansion of the Pluto Train 2 LNG facility, a key infrastructure project at one of Australia's leading gas plants. The project involved processing 400,000 tonnes of raw materials to support site preparation and foundation works while adhering to strict safety and environmental regulations. Operating in a high-risk environment, CSA employed advanced dust suppression and noise mitigation strategies to

minimise disruption. The project was completed on schedule, with CSA's skilled workforce and high-performing equipment ensuring seamless execution. CSA's successful contribution was crucial to Woodside's infrastructure expansion, further reinforcing our reputation for delivering quality and efficiency in demanding conditions.
