C D A 2.0

Cyber Defense Army

OPERATIONAL MANDATE:
CYBERSECURITY REFORGED

MISSION-CRITICAL // FOR COMMAND
ACCESS ONLY

NO. 64T373

**Deploy Your Internal Cyber Crew.
Subscribe to Measurable Outcomes.**

Traditional security services are trapped in legacy project models, leading to unclear scopes, unpredictable costs, and a perpetually reactive posture. At CDA, we recognize that threat actors move fast, and security demands a continuous defense.

CDA 2.0 is a fundamental transformation: we've evolved from a project-based vendor to your trusted internal cybersecurity crew. We deliver continuous, outcome-based defense through a predictable subscription model.

We deliver outcomes, not throw tools at you.

OLD MODEL

- Projects with unclear Cybersecurity Scope
- Billable hours, not outcomes
- Unpredictable costs and reactive posture

NEW MODEL

- Outcome-based delivery
- Continuous Defense and Transparent Pricing
- Mission-driven model for rapid deployment

NO. 64T373

Join the Army of organizations defending themselves with outcome based precision.

Recon

Your first mission focuses entirely on discovery and scoping.

Mission Cycle

Continuous improvement replaces reactive firefighting.

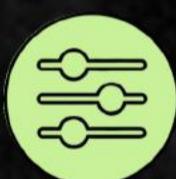

Evolve & Scale

Exponential defense emerges from human-AI synergy.

The Heartbeat

War-Level Visibility: We replace the "black box" with the WCML Protocol (Wars, Campaigns, Missions). You see exactly how tactical wins roll up into strategic victories.

Mission Control Visibility: Real-time transparency replaces the traditional consulting black box. Your continuous security posture is always visible.

Human + AI Synergy: Elite human expertise and AI automation scale your defense exponentially.

End the uncertainty.

Upgrade your Cybersecurity Strategy with guaranteed outcomes delivered.
