

Cloud Financials

A financial preparation and reporting solution for local compliance and global scale

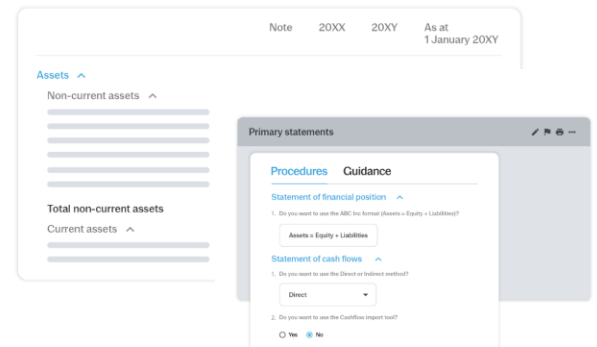

Prebuilt Templates and Frameworks

Pre-built frameworks aligned to IFRS and local GAAP frameworks ensure each financial statement is accurate and regulation-ready. No custom builds required.

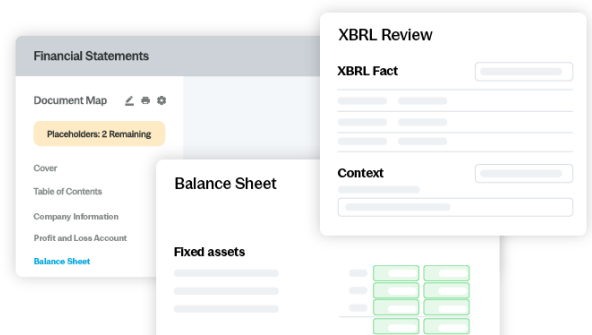

Dynamic Disclosure Management

Disclosure checklists adjust automatically based on entity size, scope and jurisdiction. Authored content in English, French, German and more. This provides jurisdictional alignment, not just auto translation.

Complete & Validated Outputs

Statements and notes are auto-generated from TB, tagged with region-specific XBRL. They are ready for export to PDF or XBRL, reducing risk of missed sections or last-minute rework.

Start using Caseware Cloud Financials today

Load TB & Scope

Load trial balances via Excel or ERP connectors and select your reporting framework (IFRS or local GAAP).

Import across common ERPs

Apply Disclosure Logic

Checklists and XBRL tags adjust disclosures based on region, size and entity scope.

Generate Draft Financials

Auto-generate fully linked drafts including statements and note disclosures, ready for edits.

Review & Validate

Highlight inconsistencies, tag changes, manage versions and override XBRL tags, all within a shared file.

Export for Submission

Generate clean Word, PDF, or XBRL files for filing or internal use, minimizing formatting errors or missed notes.
