

Cloud Audit

A secure cloud-based platform that streamlines audits from planning to sign-off.

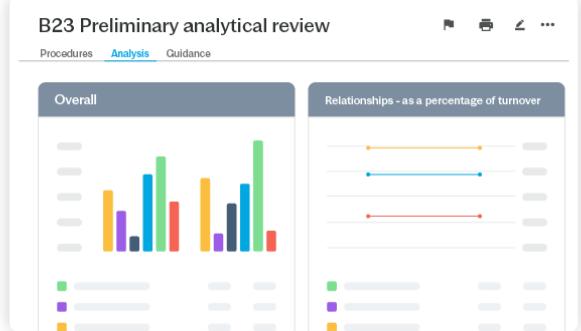

Smarter planning

See only the documents that matter. Cloud Audit's tailoring questionnaire builds the engagement file around your responses. Irrelevant sections are removed and work is automatically mapped to financial statement assertions.

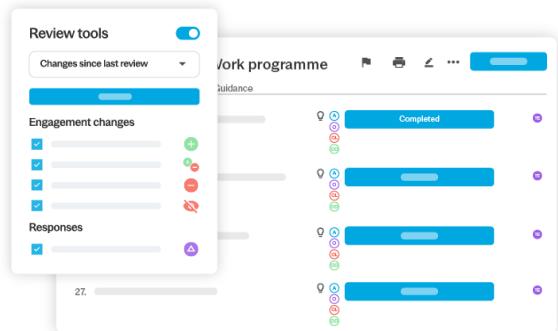

Integrated Analytics

Access the Analytics Hub with 300+ automated journal entry tests. Test full populations of transactions, perform analytical reviews and identify anomalies early. Strengthen audit evidence and elevate professional scepticism.

Effortless Collaboration

Send tailored requests to clients who upload files securely with simple drag and drop. Meanwhile your audit team works together in a single live file with no check-in or check-out conflicts and no version issues.

Start using Cloud Audit today

Plan & Set Up

Start with preliminary tailoring that shapes the audit file around your engagement. Only relevant documents and procedures are shown, so teams can focus on what matters.

Gather Client Data

Gather audit information such as trial balances, schedules and supporting documents. Clients drag and drop responses directly into the platform.

Import & Analyse

Use the Analytics Hub and analytical review tools to highlight anomalies and focus on higher-risk areas.

Fieldwork & Execution

Work programmes are fully integrated and linked to assertions. Toggle procedures on or off depending on identified risks and add bespoke steps where needed.

Review, Roll-forward & Closing

Gain full visibility into the engagement. Review progress easily, then roll forward prior year work for consistency, efficiency and time savings.

AiDA, your built-in intelligent assistant, helps auditors get real-time guidance and contextual help right within the file.

Caseware AiDA
