

A risk-driven audit solution grounded in AICPA methodology, purpose-built for the future-ready firm.

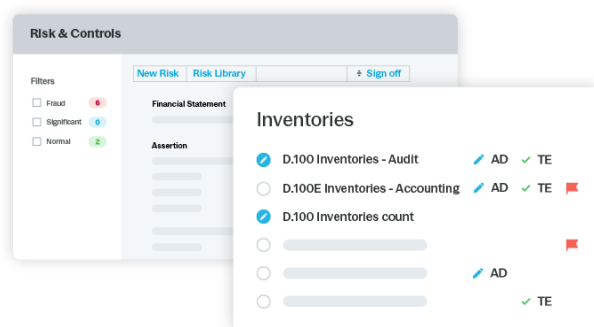

Risk-Driven Approach

Unlike solutions that rely on broad, pre-set audit programs, DAS helps auditors assess risks individually. Intuitive workflows, automated data connections and built-in prompts guide your team through identifying, assessing and responding to risks with precision.

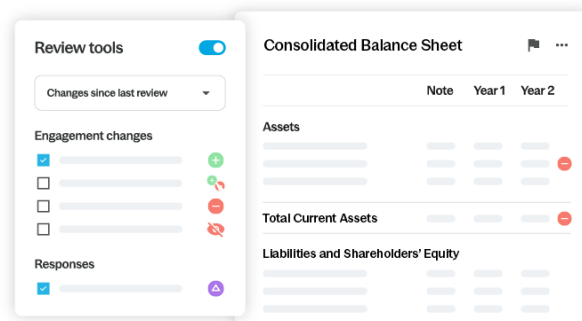

Integrated Workflow and Data Reuse

Data flows seamlessly through the entire engagement once imported, eliminating silos and redundant entries. This connected approach improves accuracy, reduces re-work and maximizes value at every stage of the audit.

Flexible Audit Responses

DAS moves beyond rigid, pre-set audit programs. Auditors select from a robust response library or build custom procedures for each identified risk, keeping professional judgment at the center of every engagement.

Start using DAS today

Set Up Your Engagement

Select your industry and reporting framework to configure the taxonomy, then import your trial balance. DAS builds your engagement structure and surfaces relevant risk indicators.

Evaluate Internal Controls

DAS helps teams develop business process narratives and define entity-level and process-level controls, generating risk indicators that directly inform the audit response.

Leverage Audit Data Analytics

Your imported general ledger instantly populates the Ratio Trend Dashboard and Account Flow Dashboard, letting you analyze transaction populations and pinpoint anomalies in real time.

Assess and Respond to Risk

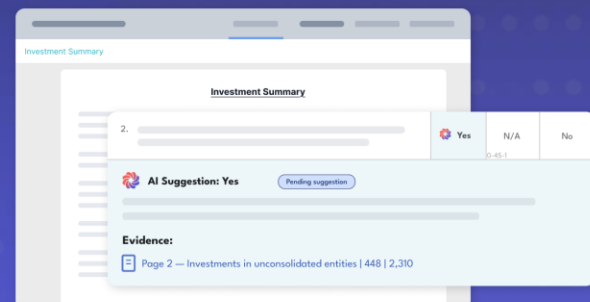

Identify individual risks with built-in guidance and AI-assisted tools. Select from the DAS response library or develop custom procedures tied directly to each assessed risk.

Complete Fieldwork and Reporting

Complete testing, support financial statement preparation and close your engagement through integrated workflow support across every phase of the engagement.

The Disclosure Checklist Agent

Built directly into the DAS engagement workflow, this AI-powered agent drafts first-pass disclosure checklist responses from financial statements, with reasoning and anchored citations auditors can review, validate and approve with confidence.

Caseware is the leading global provider of cloud-enabled solutions for audit, assurance, financial reporting and data analytics for accounting firms, corporations and government regulators. Caseware's innovative tools and platforms help more than half a million users in 130 countries work smarter, dig deeper and see further as they transform insights into impact.
