

HYPERGLIDETM SE COMPACT

Crafting Quality, Engineering Excellence: Innovation Doesn't Stop at the Door

Compact

Featuring low-profile, fully enclosed head unit and leg frames, the HYPERGLIDE SE COMPACT is the perfect choice for pedestrian and low-clearance applications. The slim AIRSTRIP aids the curtain in smooth and rapid operation while creating separation in the top roll, keeping your door cleaner for longer.

Durability

Our durable PVC door blade is designed to last in high traffic areas, while the slimline fiberglass windbars provide resistance against wind and pressure environments

Relocation & Knock-out Function

The relocation function is critical for keeping your facility operational when an impact occurs. The custom designed guide profile allows the curtain to remove from the guide profile and be relocated easily, reducing downtime and repair costs.
