Global Recognition Grows: Well Cell CEO Scott Hepford Earns Second Gusi Peace Prize Nomination

Well Cell Global is proud to share that CEO and co-founder **Scott Hepford** has been nominated for the **2026 Gusi Peace Prize**, marking his **second consecutive nomination**.

During this year's ceremonies in Manila, Scott was invited to **keynote the opening night** honoring the most accomplished physicians of the Philippines.

His presentation highlighted the growing international interest in Well Cell's PIR® technology and its promising potential to reshape metabolic health.

Scott's nomination also reflects his work beyond Well Cell. Through the **Global Leadership Initiative** with the University at Buffalo, he helps guide MBA students across **19 developing countries** into entrepreneurship, strengthening local economies. His work with **Father's Destiny in Uganda** supports entrepreneur-driven humanitarian programs focused on long-term community uplift.

“This nomination reflects the incredible work our team is doing with PIR® and the global interest in new approaches to metabolic health,” Scott said. “It’s an honor to see Well Cell recognized on an international stage, and I’m proud to accept it on behalf of everyone moving this mission forward.”

IMPORTANT ANNOUNCEMENT ABOUT REORDERS

Well Cell will be closed for shipping and therefore will make NO shipments between December 22 and January 5. Any reorders MUST BE RECEIVED by Well Cell by December 15, 2025. There will be no exceptions, so if you need to order any equipment or supplies from Well Cell, make sure we have your reorder request **on or before 12/15/25**.

WELL CELL SPONSORED “STATE OF DIABETES” for AMERICAN DIABETES ASSOCIATION

On November 21, 2025, Well Cell was proud to be a Gold Sponsor for the American Diabetes Association at the University of Houston. The event was part of the American Diabetes Awareness Month Events. Kaitlin Bracken, Director of Development, reported that the event “was a tremendous success—with a wonderful panel discussion, amazing vendors, fabulous turnout, and an engaged audience throughout.” She further acknowledged that Well Cell’s “partnership played a meaningful role in making it all possible. WELL CELL'S RESEARCH IN [CLINICALTRIALS.GOV](https://clinicaltrials.gov)

Well Cell Global LLC's technology is listed in clinicaltrials.gov as # NCT07187479, "Outcomes of Physiologic Insulin Resensitization (PIR) in Patients With Chronic Kidney Disease and Type 2 Diabetes Mellitus." This project is randomized and double-blind, and patients currently are being recruited in the Phoenix area. Do you know someone in Arizona who might qualify? Here is the link: <https://clinicaltrials.gov/search?locStr=Arizona&country=US&state=Arizona&cond=diabetes%20and%20CKD&intr=physiological%20insulin%20resensitization>.

We will keep you advised of all research underway by Well Cell Global on its journey and goal to help PIR® become the global standard of treatment for metabolic disorder.

DO NOT BE FOOLED BY PRETENDERS!

REMINDER: Circumventors of Well Cell's patented technology are trying to trick clinic operators into accepting their inferior knock-off as PIR® technology. DO NOT BELIEVE THEM. Only Well Cell can provide Physiologic Insulin Resensitization®. Only Well Cell licensees are authorized to use PIR. NextGen PIR is a recent advancement in Well Cell's technology that will help with decreased infusion time for providers and patients, infusion cost reductions, and increased patient satisfaction! Well Cell will always be leading this field!
