\$1 Trillion in Gains A Billion Customers, A No-Brainer

The fastest way to unlock **\$1 trillion in global economic gains?** Invest in Women's Health; it's a compounding gain.

Healthier women mean **stronger families, workforces, thriving industries, and supercharged GDP.**

£11 Billion Lost Future-Female Workspaces

Untreated women's health issues cost the UK economy **£11 billion annually** in lost work.

Women don't just participate in workforces, they are **co-creators of the future of work**. Work should cater to menstrual health, maternity care, and menopause.

\$1 Returns \$20 The Motherhood Multiplier

Every \$1 invested in maternal and child health yields \$20 in economic returns.

When women have access to quality maternal care, they raise healthier, better-educated, and more financially secure children.

£1-to-£11 Effect The OB/GYN Prerequisites

Every additional £1 invested in obstetrics and gynaecology services per woman in England could generate £11 in return.

Femtech is surging, institutional capital is mobilising, and new public-private investments realised.

300% VC Surge Our Healthcare Unicorns

Global VC funding for women's health has surged 300% since 2018, with 35 successful women's health startup exits (including 4 IPOs) in the past five years.

The next decade will belong to those who recognise the mutual value at play.

FlexiGyn™
connected. gynaecology. on-demand.

Meeting women where they are by rewriting the story of uterine health.

FlexiGyn™ isn't just a device, it's a doorway toward gentle uterine care that's around the corner, feels as quick-and-easy as a check-up and as familiar as your trusted nurse. No operating rooms, no intimidating long waits - just the care you need, when you need it.
