— THE MODEL

Zone-Based Home Security

Zone-based security protects members within a fixed radius using AI-enabled cameras, live CCTV monitoring from our Security Operations Centre, and ground patrol units, preventing threats before they happen, within a 0-90 second response time.

Get all the benefits of dedicated home security without the cost of a private security team.

- AI & human CCTV monitoring
- 24/7 command centre oversight
- Dedicated rapid-response ground patrols
- Panic button protection

— WHY OVERWATCH

Built to Detect & Prevent

Detect & Prevent

Overwatch **detects nearby threats** and interrupts them before they reach your home.

No Passive Monitoring

Alarms alert you, cameras monitor. Overwatch operators **take action in up to 90 seconds**.

Trained Threat Prevention

Our patrols and operators are trained to **detect and prevent suspicious activity** in real time.

From Connected to Fully Covered

01 Discovery Call

Our security coordinator learns more about your property, concerns, and location to ensure you're eligible for the program, and to select the right Overwatch™ package for your home.

02 Security Assessment

After selecting your Overwatch™ package and completing the enrolment phase, our security expert visits to analyze your property, map vulnerabilities, and build a customized implementation plan.

03 Installation

We schedule a time to install your cameras, alarms, and panic buttons, fully integrated with our Security Operations Centre.

04 Activation & Protection

Your home is actively covered in the Overwatch network, backed by coordinated monitoring and rapid patrol response, based on your selected plan.
