

Protection planned around your street, shared with your neighbours.

Every pod is built around the security concerns and challenges specific to your area, with the cost shared between neighbours. On the ground, OZINT operators bring a standard of training well above typical security guards, preventing incidents before they start and responding when it matters.

What is Private Pod Protection?

Dedicated residential security coverage, exclusively assigned to a defined group of homes within your immediate area:

- ✓ **Rapid elite ground response**, dedicated to your residential pod
- ✓ **Ongoing physical ground patrols** and inspections, for active deterrence
- ✓ **Trained security operators**, professionally trained personnel assigned exclusively to your pod
- ✓ **Your pod's own incident log**, updated every shift
- ✓ **Optional per residence**: panic system and outdoor siren, plus live CCTV monitoring
- ✓ **Command Centre oversight**: real-time supervision, threat verification and coordinated response

Private. Dedicated. Built around your street.

Routes mapped to your streets

Strategically designed around your pod's access points, laneways, sightlines and areas of vulnerability.

Customized coverage

Day, night or 24/7, timed to when your street is most exposed.

Early threat detection

Operators remain alert to suspicious activity before it develops into an incident.

Direct guard communication

App access for guard communication, connecting you directly with the team protecting your property.

Operators who know your pod

Familiarity with your street's established patterns enables earlier identification of unusual activity.

More homes. Stronger response.

A security unit that scales with you.

Proactive protection, planned around your street

Dedicated ground security

The foundation of every pod. A presence assigned exclusively to your homes: visible patrols deter, and trained operators respond on the ground, backed by our Command Centre.

Elite-trained operators

These are not your average guards. Trained to detect, deter and prevent, they disrupt threats early and remove the opportunity for incidents.

Direct guard communication

App access connecting you directly with the team protecting your property.

Coverage set by your community

Day

Protection while your home is unattended.

 12h

Night

Protection throughout the vulnerable nighttime hours.

 12h

24/7

Around-the-clock protection, whether home or away.

 24h

OPTIONAL PER RESIDENCE

Add a panic system, outdoor deterrence siren and live CCTV monitoring for homeowners seeking an additional layer of proactive protection, all seamlessly connected to the same OZINT Command Centre overseeing your pod's ground team.

Panic system

Panic buttons and outdoor sirens for immediate deterrence, Command Centre alert and rapid ground response.

Live CCTV monitoring

Your cameras monitored live by our Command Centre, connecting real-time threat detection directly to response on the ground.

Activate your pod today

1

Book a Pod Briefing

Tell us about your street and the concerns in your area.

2

Planning call

We map your streets, concerns and coverage needs.

3

Neighbour session

In person or by video, neighbours meet OZINT and ask questions.

4

Onboard and launch

Your plan is finalized and operators begin patrolling.

Book a Pod Briefing

Tell us about your street and we'll show you what a pod built for it looks like, and how pricing changes as neighbours join.
