

ARMoured TRANSPORTATION BY OZINT

THE OZINT ARMoured FLEET

Protection for every mile, and every moment.

At OZINT, protection doesn't stop at your front door. It moves with you. Custom-built armoured vehicles, operators trained in defensive and evasive driving, and live oversight from our Command Centre, for executives, families and high-value assets that can't afford a single unplanned moment.

Comfortable. Confident. Confidential.

Every vehicle built to our own specifications, for the situations most people never plan for.

LAYER 1

Armoured vehicles

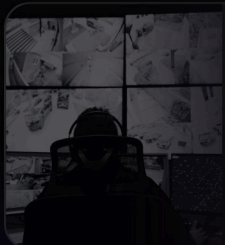

Fully armoured, fully equipped vehicles designed for maximum safety and discretion. Every one starts as a premium platform, then becomes something else entirely. Customizable and made to order.

LAYER 2

Operational drivers

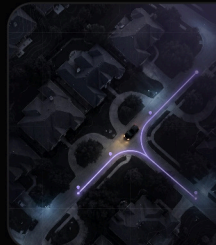

Trained protective operators skilled in defensive and evasive driving. Every route executed with precision, discipline and strict confidentiality, door to door.

LAYER 3

Real-time monitoring

Live tracking and communication link every vehicle to the OZINT Command Centre, with instant coordination with additional patrol units or police if needed.

LAYER 4

Intelligence-led route planning

Every turn mapped before you take it. We analyze environmental risk, traffic patterns and real-time updates. Minimal exposure. Maximum efficiency.

Most people think armoured transport is about the vehicle. It isn't. The vehicle is the last layer. The real work happens in the planning that happens before anyone gets in the car.

Zohar Haimov, Founder & CEO, OZINT Security Group

Built, not bought

Our vehicles meet the same elite standard as our operators, combining serious protection with the comfort our clients expect.

Stealth on the outside.
Strength on the inside.

Hardened ballistic glass

Multi-layer transparent armour on every occupant window.

Armoured doors and panels

Protection built into the body, not bolted onto it.

Reinforced frame

Engineered to carry the added armour without compromising handling.

Protected floor and pillars

Coverage where standard vehicles are left exposed.

Secure cargo vault

An armoured compartment for valuables, documents and goods.

Mobile command link

A live extension of our Command Centre, on every journey.

Who we protect

Executives & public-facing professionals

Airport transfers, court appearances and high-stakes negotiations, where planning matters most.

Families & high net worth households

Moving family between residences, school and events, from driveway to destination.

Jewellers, auction houses & high-value retail

Inventory, consignments and client pieces moved between showrooms, vaults and viewings.

Businesses moving cash & valuables

Secure, documented movement of cash, negotiable instruments and high-value goods.

Crypto holders, exchanges & digital asset professionals

Founders, traders, exchange operators and high-net-worth holders whose wealth is visible online and increasingly targeted offline. Travel to meetings and conferences, movement of hardware wallets, keys and sensitive devices, and protection through periods of public exposure.

When clients call us

Airport & cross-border travel

High-profile events

Transactions and closings

Valuables and cargo

Elevated risk windows

Ongoing executive programs

How it works

1

Assessment

A confidential briefing on the asset, route and exposure.

2

Customization

Vehicle, operators and route matched to your exposure.

3

Deployment

Armoured vehicle, trained operators, live oversight.

Move securely. Arrive protected.

Single transfers or ongoing programs, planned around your exposure. Nothing more, nothing manufactured.
