(Usually R16800).

Restore. Refine. Radiate.

This advanced facial rejuvenation experience

combines two synergistic technologies that treat both the surface and structure of your skin — for results you can see immediately as well as improvement over time.

A next-generation hybrid bio-stimulator and filler treatment replenishes lost volume, restores facial harmony, and activates your skin's own collagen and elastin production. Unlike traditional fillers, it not only lifts and sculpts but continues to improve firmness and elasticity in the months that follow — making it an ideal once-a-year renewal ritual.

Paired with Laser Genesis skin therapy, which gently resurfaces, refines pores, and evens tone using non-ablative light energy, this dual approach addresses both internal rejuvenation and external radiance. The result: skin that appears smoother, firmer, and naturally luminous — a timeless glow that deepens with every passing week.
