1. Purpose

The Akademia Academy Vocabulary App supports steady vocabulary growth through structured practice, progress tracking, and interactive learning tools. This policy explains how early access works, how invite codes are issued, and how access will change as the Akademia Academy Portal expands.

2. What the App Includes

- Vocabulary bank building (save and review words over time).
- Progress tracking (streaks, levels, mastery, and activity patterns).
- Exercises (guided practice to build accuracy and recall).
- Games and challenges (interactive formats for routine practice).
- Tournaments and competitions (when available).
- Additional languages may be added as Akademia Academy expands.

3. Early Access Summary

Early access is currently **free**, but an **invite code is required** to sign up.

Invite codes are issued based on eligibility and availability. Akademia Academy may request verification details where appropriate.

4. Access Types (matches the request form)

When requesting a code, select one Access Type exactly as written:

Student-I am enrolled	For learners currently enrolled in Akademia Academy lessons.
Student- purchasing a package	For learners intending to enroll by purchasing a package.
Non-student-Founders Access request	Limited early access for non-students (Founders).

5. Student Access

Students receive access codes after enrollment or purchase confirmation. Akademia Academy may request the purchase email and an order reference/invoice/booking ID to verify eligibility.

6. Founders Access (Non-students)

Founders Access is limited to **500 profiles**. Codes are emailed in order of availability.

Founders Access is intended for non-students during the early access phase. Access rules may evolve as the Academy Portal is integrated.

7. Under 16 Requirement

If the learner is under 16, a parent/guardian email is required on the request form. Akademia Academy may contact the parent/guardian email for confirmation or policy-related notices.

8. Activity, Warnings, and Retaining Access

To keep the app available to active learners, Akademia Academy uses a warning-based approach before removing access.

8.1 Non-students (Founders): inactivity is based on app login

Inactivity is measured from your **last app login**.

- **90 days** since last login: First reminder (courtesy notice).
- **180 days** since last login: Second reminder (stronger notice).
- **About 11 months** since last login: Final reminder (about 1 month before 1 year).
- **12 months** since last login: Access is removed. You may request a new access code if you return.

8.2 Students: inactivity is based on Academy participation

Inactivity is measured from your **last completed Akademia Academy lesson** (last lesson date).

- **90 days** since last lesson: First reminder (check-in and support).
- **180 days** since last lesson: Second reminder (access at risk if the break continues).
- **About 11 months** since last lesson: Final reminder (about 1 month before 1 year).
- **12 months** since last lesson: Access is removed. If you restart lessons later, you can request a new access code.

Warnings are sent to the email address on file. If your email changes, contact support so you do not miss important notices.

9. Transition to Portal-only Access

The Vocabulary App will integrate with the Akademia Academy Portal. After this integration, access will be provided through Academy student profiles.

Founders cutoff date: 2027-02-01

9. Transition to Portal-only Access (continued)

- Founders accounts created before **2027-02-01** and kept active retain access during the transition.
- If a Founders account becomes inactive, access will end and a new code will be required (subject to availability).
- After **2027-02-01**, access is expected to run through Akademia Academy student profiles as we integrate the Academy Portal.

10. Fair Use and Conduct

- Sharing, reselling, or distributing invite codes.
- Cheating or exploiting bugs in games, tournaments, or challenges.
- Harassment, abusive language, or disruptive behavior in community features.
- Attempts to access restricted areas or other users' data.

Akademia Academy may suspend or remove access for misuse or repeated violations.

11. Data and Communication

The app may store learning activity (saved words, progress, streaks, and performance) to provide progress tracking and reporting features. Akademia Academy may email you about access codes, warnings, and policy updates.

12. Policy Updates

Access rules and features may evolve as the Academy Portal is integrated and as new languages and tools are added. The most recent version of this policy is effective immediately unless a later date is stated.
