

Stage 2

Turntable + Lightbox Combo

Who Uses This Stage?

As one of our premier automotive offerings, Stage 2 is known for our killer combo of turntable, lightbox, 3-wall CYC, and half-CYC ceiling overhang. Drive right onto our turntable from the ground level, then raise, turn, and tilt it with a multidirectional capability to capture that perfectly lit detail.

Veteran auto shooters love and prefer this space. Stage 2 has also been utilized for innovative, theatrical, Virtual Reality (VR), and music video applications.

Need a green room or additional production space with easy access to the front door for VIP entry? A second-floor office suite is accessible from inside stage 2 and available as an add-on. Additionally, clients can add on the Vaucluse, a feature including both a casual sitting area and adjacent conference room for clients and their teams. With an incredible skylight, clients will have plenty of natural sunlight.

Everything you need is pre-installed so your team can drive on, light it up, and start production in under an hour. No messing around here, we save you time, labor, and money.
