Site36O
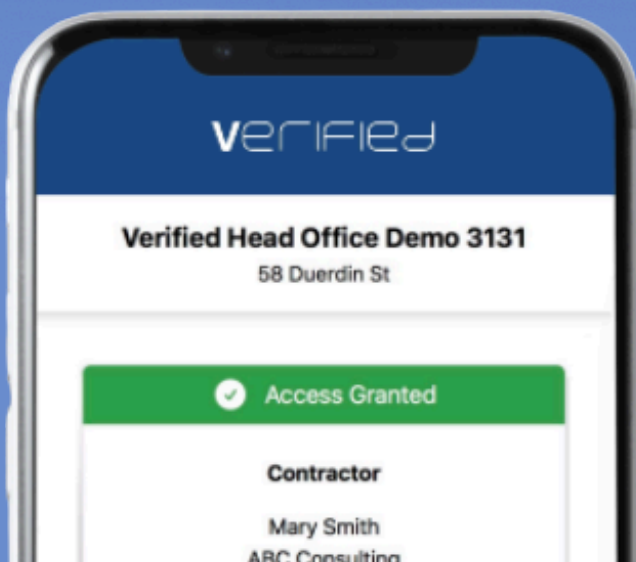

Why Site36O Over Verified

Site36O doesn't just onboard contractors—it gives you real–time pre–qualification, instant compliance checks, and live oversight across every site. Unlike **Verified**, which mainly tracks documents and tasks, **Site36O** puts full operational control and automated safety workflows at your fingertips.

FEATURES	VERIFIED	SITE360
CORE PRODUCT	Real-time multi-site oversight, compliance	Visitor, Contractor & Supplier Management
REAL–TIME OVERSIGHT	❌ Limited real-time presence tracking	✓ Geo-Fenced check-in/out, live headcount, evacuation roll call
ACCREDITATION & COMPLIANCE	✓ Tracks contractor documents, but no live enforcement	✓ Blocks unaccredited visitors, tracks inductions & certifications
EMERGENCY MANAGEMENT	❌ No emergency or live site tracking	✓ One-click evacuation notifications & live roll-call
MULTI–SITE MANAGEMENT	❌ Focused on contractor records, limited operational visibility	✓ Real-time dashboards across sites, regions, national
AUTOMATED WORKFLOWS	❌ Manual follow-up required for task completion	✓ Digital work authorities, safety checks, and notifications
EASE OF DEPLOYMENT	Moderate setup; primarily documentation-focused	✓ Fast cloud-based setup, no hardware required
USE CASE FIT	Best for basic contractor onboarding and minimal record-keeping	Best for live oversight, compliance, and risk management

TALKING POINT

We Already Use Verified, Why Switch?

Verified is a suitable solution for basic record keeping, but it does **not** solve more complex documentation and reporting requirements, as well r**eal-time, on-site presence and contractor pre-qualification.**

TALKING POINT

Can't Verified handle compliance?

Verified tracks documents, but **Site360 goes beyond** and **proactively** enforces contractor compliance, automates safety workflows and reminders, as well as blocking unapproved contractors from signing-in, in the first place.

TALKING POINT

We're Worried About Onboarding Complexity

Verified's reports are limited to static documents and task logs, without real-time dashboards, multi-site analytics, or integration with BI/ERP systems. Site360 allows all this and more, allowing you to make more strategic decisions.

TALKING POINT

What About Cost?

Verified charges **per contractor/module,** which can scale quickly. Site360 uses site-based pricing, making multi-site deployments more cost-effective and pricing easier to track.

Why Businesses Are **Switching** From *Verified* To Site360

Here's Why Some Of Our Clients Made The Switch

➤ "Site360 is easy & geo-based, so we were able to roll out at every site within a day."

➤ *"Safety is our top priority. We are able to know who's on each site instantly through Site360's live visitor dashboards."*

➤ *"Managing contractors on hundreds of stores was a nightmare. Site360 provides multi-site oversight & reporting"*

WHEN TO PICK Site360

✗ **Verified = Reactive**
Adequate for document tracking but reactive and limited in live environments with reporting requirements.

✓ **Site360 = Proactive:**
Automated workflows, deeper contractor screening, multi-site control and strategic reporting. An end-to-end solution.
