# Site360

Why Site360

Over SafetyCulture

Site360 is the simplest way to **manage everyone on-site, ensure compliance, and keep people safe in real time**. Unlike SafetyCulture, which focuses on inspections and audits, Site360 is purpose-built for visitor, contractor, and supplier management with live oversight

FEATURES	SAFETYCULTURE	SITE360
CORE PRODUCT	Inspections, Audits & Checklists	Visitor, Contractor & Supplier Management
REAL-TIME OVERSIGHT	❌ Limited real-time presence tracking	✓ Geo-Fenced check-in/out, live headcount, evacuation roll call
ACCREDITATION & COMPLIANCE	❌ Templates for audits, but no live accreditation enforcement	✓ Blocks unaccredited visitors, tracks inductions & certifications
EMERGENCY MANAGEMENT	❌ Issue reporting but no live evacuation tracking	✓ One-click evacuation notifications & live roll-call
MULTI-SITE MANAGEMENT	✓ Inspection reporting across sites	✓ Real-time dashboards across sites, regions, national
OFFLINE CAPABILITY	✓ Strong – inspections offline, sync later	❌ Limited – designed for connected, real-time environments
EASE OF DEPLOYMENT	❌ Longer onboarding, more configuration	✓ Fast setup, no hardware required
USE CASE FIT	Best for audits, inspections, and checklists	Best for managing who is onsite, real-time safety and ensuring compliance

Site36O

TALKING POINT

We Already Use SafetyCulture, Why Switch?

SafetyCulture is great for inspections, but it does **not** solve **real-time, on-site presence and contractor accreditations**. Many clients run both — SafetyCulture for audits, Site360 for visitor/contractor compliance.

TALKING POINT

Can't Safety Culture Already Do All This?

Not in **real time**. SafetyCulture logs inspections *after the fact*, while Site360 *actively* **prevents** unsafe, unaccredited people from being onsite in the first place

TALKING POINT

We're Worried About Onboarding Complexity

Site360 is **cloud-based, live and agile with no extra hardware needed.** Staff and Contractors love how simple we are to use — fewer clicks, less admin.

TALKING POINT

Okay But What About Cost?

Here's the Knockout Blow. SafetyCulture charges **per-user.** This quickly becomes very expensive. **Site360 charges per-site. Unlimited** amount of users can check in and out of site at no extra cost, allowing huge scalability for multi-site businesses.

Why Businesses Are **Switching** From *Safety Culture* To Site36O

Here's Why Some Of Our Clients Made The Switch

➤ *"We didn't want a heavy audit tool — just something easy to manage checks ins and keep sites compliant."*

➤ *"We needed to know exactly who is on-site, right now, across all our sites. No-use knowing after the deed is done."*

➤ *"Contractor compliance was a total nightmare — inductions, licenses, insurance, accreditations. This made it all easy."*

WHEN TO PICK Site36O

✗ **SafetyCulture = Reactive**
Strong Inspections Tool, but *'rear-view mirror'* approach to safety (**after the issue & risk).**

✓ **Site360 = Proactive:**
Prevents non-compliant Contractors from entering in the first place, with li**ve headcounts** and **real time safety**.
