

Why

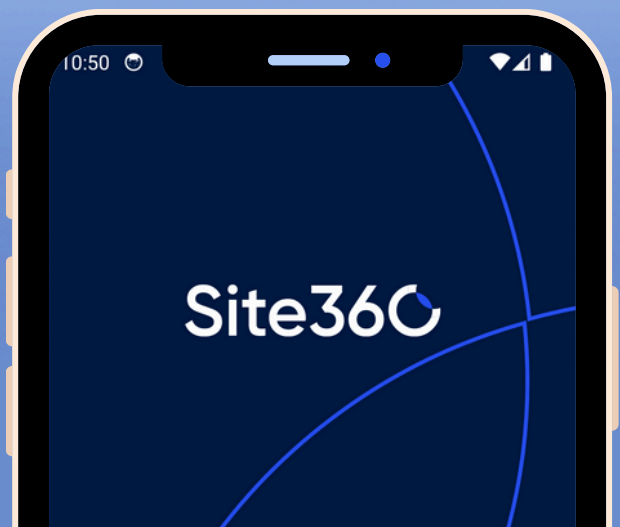

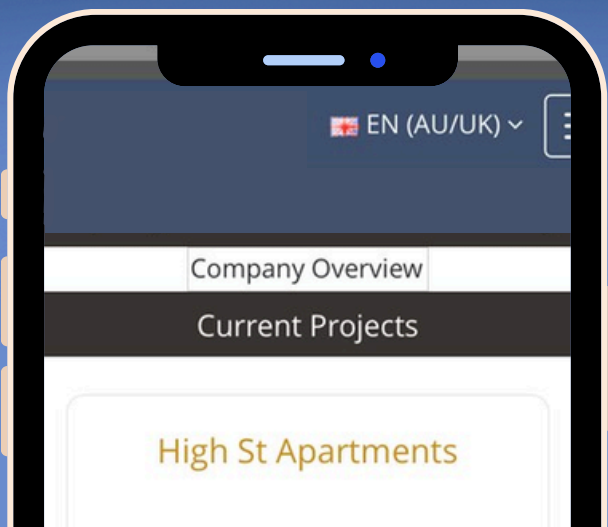

Site360

Over HammerTech

While both platforms enhance safety and operational control, **Site360** offers a **broader** and **more versatile** solution. Purpose-built for home **builders, retail, and aged care**, it delivers **full-site visibility** across safety, compliance, and contractor management—helping teams streamline daily operations and stay audit-ready.

HammerTech, by comparison, is a strong choice for **large-scale construction companies** with **complex** WHS and induction needs. However, Site360's **flexibility, simplicity, and wider industry fit** make it the smarter option when seeking an all-in-one platform that **adapts seamlessly to diverse operational environments**.

FEATURES	HAMMERTECH	SITE360
INDUSTRY SUITABILITY	Heavily construction - focused	Building / Construction, Retail, Aged Care, Facilities Management
360° VISIBILITY	Form-based workflows, no visual site presence as there are no Geo-Fencing capabilities.	Real - time site presence due to Geo-Fencing, visual mapping of risks, assets and contractors
COMPLIANCE	Construction based WHS compliance	Comprehensive method to structure standards & accreditations across industries
CONTRACTOR MANAGEMENT	Designed for subcontractors on construction projects	End-to-end solution. Inductions, compliance documents, safety, live monitoring, data.
EASE OF USE	Tailored for construction supervisors & safety officers	Intuitive dashboards, drag-and-drop, mobile-first
AUDIT READINESS	Construction reporting; limited Healthcare alignment	Immediate reporting against compliance standards, particularly strong for Aged Care
SCALABILITY	Best suited to individual project sites	Fits multi-site eco-systems, great for home builders and multi-site businesses.

TALKING POINT

Registration / Onboarding Friction

HammerTech's registration and onboarding can be **frustrating**, with users reporting difficulties getting contractors and workers set up. Site360 removes friction with **fast, self-service onboarding** that gets your workforce compliant in minutes.

TALKING POINT

HammerTech Does A Lot

HammerTech is often **complex**, with too many screens and steps making **safety processes harder, rather than simpler** for your workforce. Site360 is much simpler and more efficient. Fast, intuitive app workflows make safety and compliance effortless.

TALKING POINT

How Does HammerTech Compare With Documentation?

HammerTech has **limited** document management and storage, with subcontractors often keeping files **locally** and **struggling to transfer** documents like Safety Data Sheets (SDS) **between** projects. Site360 provides **secure, cloud-based storage** accessible by **anyone** across **any** site, ensuring consistent documentation and easier access **organisation-wide**.

Why Businesses Are Switching From HammerTech To Site360

Here's Why Clients Are Making The Switch

- **Safer. Smarter. Simpler.** —
HammerTech is complex and your workers notice. Site360 ensures safety & compliance is done right each time because we've made it easy and fast.
- **Comprehensive Onboarding, Anywhere, Anytime** —
Site360 simplifies onboarding with just a few easy steps—less waiting, more working. Contractors stay productive with instant access to the same documents across every site
- **From Reactive To Proactive** —
Site360 knows exactly which contractors are on site in real time, letting you enforce safety workflows and capture accurate site data instantly. HammerTech pales in comparison.
- **Adaptable, Agile, For YOU** —
HammerTech is designed for large-scale construction projects. Site360 takes the best features and combines them into an all-in-one platform, built to work seamlessly across any industry.

WHEN TO PICK Site360

✗ HammerTech = Niche, Complex

HammerTech is great if you're in larger-scale construction. Outside of this, it is too complex and too slow.

✓ Site360 = Simpler, Faster, More Suitable

Site360 provides simpler, faster onboarding and streamline safety workflows. Unrivalled **Geo-Fencing** means real-time overview & suitability for any industry.
