

SWMS Workflow

1

Captured

Businesses and contractors submit their existing SWMS documentation to the Site360 team.

Adaptated

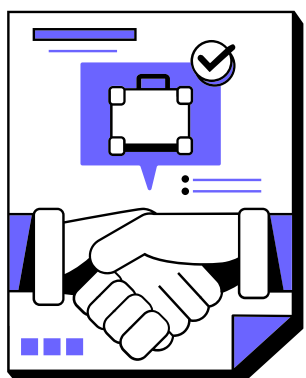

The Site360 team adapt your SWMS into clear, easy-to-use templates within the Site360 platform.

Rolled Out

Contractors check -in to sites & get instant access to site specific SWMS in the app, with all the necessary information pre-loaded in.

2

Completed

Signed SWMS documents are tied to the contractor, site, and date/time, delivering a fully **site-specific** record.

3

Executed

Complete your pre-built SWMS with just a signature. (Additional info can be added as required).
