

Scoring, Flagging & Close-Out Workflow

1

Scored

Assign customisable 'scores' throughout your workflows, to enable consistent assessment of site compliance, task completion, and contractor capability.

Flagged

Low scores or high-risk items are automatically flagged and recorded as incidents within Site360.

Relayed

Flagged incidents are automatically sent to the relevant vendors for investigation and follow-up with the contractors involved.

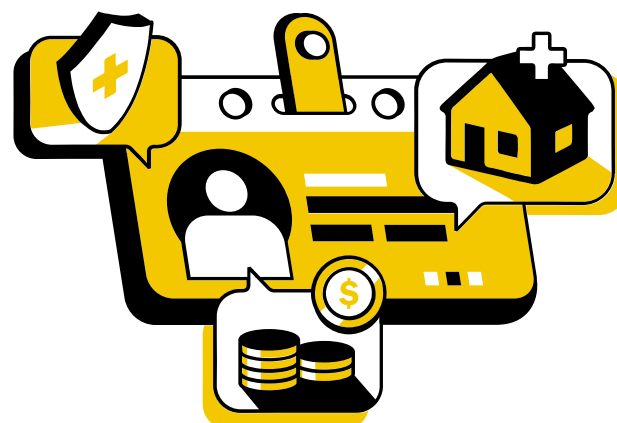

2

Closed Out

Resolved incidents are closed, and preventative actions or workflow changes can be implemented based on findings.

3

Investigated

Investigations are managed in Site360 with in-built communication as well as photo evidence and remain open until corrective actions are approved.
