- Shrinkage
- Storage
- Out fees

How the Silo Bagging System Works?

Why Growers Are Switching to Silo Bag Storage?

- Harvest When the Crop Is Ready
- Save \$50 plus per tonne
- Reduce Harvest Labour Pressure
- Protect Grain Quality
- Take Control of Grain Marketing
- Harvest without Bottlenecks

Questions for Growers

1. What normally slows your harvest down the most?
2. Do trucks or receivals ever limit how fast you can harvest?
3. How much grain do you deliver straight off the header?
4. Would on-farm storage give you more flexibility?
5. Do you have the option to sell grain later in the season?

**With Silo Bag Solutions
you can save at least
\$50 per tonne.**

Want to know how?

Bagging allowed us to keep harvesting even when trucks were backed up for days. ”

**Curious how
the silo bagging
system works?**

Speak to SiloBag Solution about machinery, bags and system design for your operation.
