Marooka PM 38.528sp Tracked HIAB – with Pole Carrier

Combining powerful lifting capability with excellent off-road mobility, the Marooka MST 2200 fitted with PM 38.528sp is a tracked crane built for remote and environmentally sensitive operations.

Overview

Mounted on a low ground pressure tracked carrier, the Marooka MST 2200 c/w PM 38.528sp loader is designed for lifting and transport operations in remote or environmentally sensitive areas. Its high-performance knuckle boom crane provides excellent reach and precision, allowing safe placement of materials in confined or hard-to-access locations. The addition of a flatbed, pole carrier or cable carriers enhances on-site efficiency by enabling transport and lifting in a single operation.

Ideal for: Telecoms, utilities, infrastructure, and remote site lifting operations
