

Ground Protection

Aurora's heavy-duty ground protection systems provide safe vehicle access while protecting sensitive terrain from damage.

Overview

Aurora's range of ground protection mats enables safe movement of vehicles and machinery across soft or sensitive ground. Designed for rapid deployment, they minimise environmental impact while maintaining stability and safety on site.

Ideal for: Construction, utilities, events, and environmentally sensitive sites

Specifications

- **Load Capacity:** Up to 400 tonnes (model dependent)
- **Materials:** HDPE / recycled plastic
- **Sizes:** Various (2.4 m – 4.34 m length options)

Key Features

- High load-bearing capacity
- Quick installation systems
- Durable and reusable materials
- High-traction surfaces
- Suitable for all terrain types
